EXECUTIVE SUMMARY

Results of the New England Common Assessment Program (NECAP) tests, administered back in October 2010 to students in grades 3-8 and 11, revealed that at the *state level*, roughly 55 percent of Rhode Island students were proficient or above in *mathematics* (up 1 percent from the previous administration in October 2009), 71% were proficient or above in *reading* (no change from previous results), and 57 % were proficient or above in *writing*.

Statewide aggregated results in reading by *grade level* show that only grades 6, 8, and 11 had statistically significant gains (up 3, 4, and 3 percentage points, respectively) while grade 7 had a statistically significant decrease (down 5 percentage points) in the percent of students achieving proficiency in *reading*. In *mathematics*, only grade 11 had a statistically significant gain over last year's results, with an increase of 6 percentage points to 33% of students statewide achieving proficient or above in mathematics.

Statewide aggregated results of various *student groups* in *reading* and *mathematics* show that achievement gaps are closing for some groups and widening for others. At the high school level in reading, the achievement gap between Black and White students increased 7 percentage points and between Hispanic and White students by 5 percentage points. The most dramatic *decrease* in the achievement gap in both reading and mathematics occurred at the middle school level, where the gap between monitored LEP students and their native English-speaking peers has been *reduced* by 18 percentage points in reading and by 19 percentage points in mathematics.

At the *district level*, only 1 district made statistically significant gains in *reading* while 6 districts made statistically significant gains in *mathematics*. While changes from 2009 to 2010 in reading or mathematics performance in all other districts were not considered statistically significant, 25 districts have made significant improvement in both mathematics and reading achievement compared to their performance back in 2007. In *writing*, 7 districts had statistically significant *higher* percentages than the state in terms of students who scored at or above *Proficient* at all three levels of schooling (elementary, middle, and high school) and 5 districts had statistically significant *lower* percentages than the state.

At the *school level* (elementary, middle, high), statewide aggregated results show that only high schools demonstrated significant gains from last year's results in both *mathematics* and *reading*. When results are disaggregated to reveal individual schools, only 9 schools (2 elementary, 2 middle, and 5 high schools) across the state made statistically significant gains in reading while 15 schools (6 elementary and 9 high schools) made statistically significant gains in mathematics. While changes from 2009 to 2010 in reading or mathematics performance in all other schools were not considered statistically significant, 71 schools have made significant improvement in both mathematics and reading achievement compared to their performance back in 2007; 52 schools made statistically significant improvement just in reading; 33 schools made statistically significant improvement just in mathematics; and 127 schools made no statistically significant improvement in either reading or mathematics over that same time period. In *writing*, 27 elementary, 17 middle, and 20 high schools had statistically significant *higher* percentages than the state in terms of students who scored at or above *Proficient* and 27 elementary, 20 middle, and 18 high schools had statistically significant *lower* percentages than the state.

STATE-LEVEL RESULTS

QUESTION 1:

How did students in Rhode Island perform on the NECAP Reading and Mathematics assessments?

RESPONSE:

Results of the New England Common Assessment Program (NECAP) Reading, Mathematics, and Writing assessments, administered October 2010 to students in grades 3-8, and 11 revealed that statewide, 71 percent of Rhode Island students were proficient in *reading* (up 1 percentage point from the previous administration in October 2009); 55 percent were proficient in *mathematics* (up 1 percentage point from the previous administration in October 2009); and 57 % were proficient or above in *writing*.

In general, compared to last year's results, there was a significant increase in *mathematics* and *reading* proficiency rates at the *high school* level. At the *elementary school* level, there were no significant changes in *mathematics* or *reading* in grades 3, 4, or 5. At the *middle school* level there were no significant changes at the aggregated school level (all grades combined) in *mathematics* or *reading*; however, there were significant changes in *reading* achievement at grades 6, 7, and 8. Specifically, there were 3 and 4 percentage point increases in *reading* achievement in grades 6 and 8, respectively and a 5 percentage point *decrease* at grade 7. There were no statistically significant changes in *mathematics* for grades 6, 7, or 8 (see Tables 1 to 5). In *writing*, aggregated results by school level indicate that 27 elementary schools had statistically significant *higher* percentages than the state in terms of students who scored at or above *Proficient* and 27 had statistically significant *lower* percentages than the state. At the middle school level, 17 schools had statistically significant *higher* percentages than the state and 20 had statistically significant *lower* percentages than the state, while at the high school level, 20 schools had statistically significant *higher* percentages than the state and 18 had statistically significant *lower* percentages than the state.

Most students are making progress in reading as they move through higher grade levels. For example, 60% of the 2005 third-graders were proficient or higher. Of this same cohort, 74% of students achieved proficiency or above in reading as eighth-graders in the fall of 2010. Of note; however, is the 3 percentage point *decrease* in reading proficiency for this year's grade 7 students (5 percentage point difference compared to last year's grade 7 students). However, a similar pattern is not seen in mathematics. In fact, no clear pattern emerges as students progress from grades 3 to 8. As in previous years, grade 11 students continue to struggle in mathematics as results remain considerably lower than those achieved in grades 3 through 8 (see Tables 6 and 7). One encouraging indication of improvement at the high school level is that there were statistically significant increases in achievement in grade 11 reading (+3%) as well as in mathematics (+6%) this year compared to last year's grade 11 results.

SUPPORTING DATA:

Statewide performance in reading, mathematics, and writing are shown below in Tables 1 through 7.

QUESTION 2:

How are students in Rhode Island performing on the NECAP Reading, Mathematics, and Writing assessments compared to students in Maine, New Hampshire, and Vermont?

RESPONSE:

Although 71% of Rhode Island students in grades 3-8 achieved proficiency or better on the *reading* test, they continue to lag behind their peers in New Hampshire and Vermont (where 77% and 73%, respectively, scored proficient or better in reading) and to outscore their peers in Maine (where 69% scored proficient or better). Results indicate that across all four NECAP states (RI, ME, NH, and VT), only Rhode Island students in grades 3-8 made progress in reading compared to last year's results. With a 3 percentage point gain in *reading*, results are encouraging at grade 11. This year, 76% of Rhode Island students achieved proficiency or better, versus 74% and 72% in New Hampshire and Vermont, respectively.⁸ This represents the first time since 2007, when the NECAP assessments were first administered at the high school level, that Rhode Island grade 11 students have out-performed their peers in both New Hampshire and Vermont in *reading*.

In *mathematics* this year, Rhode Island students in grades 3-8 went up 1 percentage point statewide to 59% but, like reading, continue to lag behind their peers in the other NECAP states where 71% of students in New Hampshire, 65% in Vermont, and 60% in Maine achieved proficiency or better. While Rhode Island students in grade 11 made a 6 percentage point gain in *mathematics* compared to last year, they still lag behind their peers in New Hampshire and Vermont, where 36% and 38%, respectively, achieved proficiency or better.

In *writing*, 60% of Rhode Island students in grades 3-8 achieved proficiency or better. By comparison, 60% of their peers in New Hampshire, 57% in Vermont, and 48% in Maine achieved proficiency or better in *writing*. At the high school level, 51% Rhode Island students achieved proficiency or better in *writing* versus 45% and 50% in New Hampshire and Vermont, respectively.

SUPPORTING DATA:

The state-by-state comparisons in reading, mathematics, and writing are shown below in Tables 8 through 10.

⁸ **NOTE:** Maine does not administer any of the NECAP tests at the high school level.

Table 8. NECAP Reading: 2005 to 2010 percent of students at/above “Proficient” results by state.⁹

Testing Year	<i>Reading- Grades 3-8 and (11)</i>			
	<i>Rhode Island</i>	<i>Vermont</i>	<i>New Hampshire</i>	<i>Maine</i>

Testing Year	<i>*Writing- Grades 5, 8, and (11)</i>			
	<i>Rhode Island</i>	<i>Vermont</i>	<i>New Hampshire</i>	<i>Maine</i>
2010	60 (51)	57 (50)	60 (45)	48

Note: Numbers in parentheses are for grade 11 results only.

⁹ Maine does not administer the NECAP Reading assessment at the high school level.

¹⁰ Maine does not administer the NECAP Mathematics assessment at the high school level.

¹¹ Maine does not administer the NECAP Writing assessment at the high school level.

QUESTION 3:

How did various student groups perform on the NECAP Mathematics and Reading assessments?

RESPONSE:

Statewide, a substantial performance gap continues between White students and other ethnic/racial groups across all content areas. For example, in reading, the achievement gap between White students and Black students as a whole increased by 1 percentage point statewide from 2009 to 2010 but decreased by 1 percentage point in math. For Hispanic students as a whole, the achievement gap in reading remained the same statewide, but decreased 3 percentage points in math.

At the state-level, the biggest performance gaps continue to be found in both reading and mathematics between students in IEP or LEP programs and students who are not in these programs. In reading, the performance gap between students with an IEP and those who do not have an IEP remained the same from 2009 to 2010 (49 percentage points) and increased 1 percentage point for LEP students over the same time period. In mathematics, the performance gap between students with an IEP or who receive LEP services and those who do not has increased by 1 percentage point for IEP students and stayed the same for LEP students from 2009 to 2010. The results are more encouraging when they are delineated by school level (elementary, middle, and high). For example, this year the achievement gap in reading and mathematics at the middle school level between monitored LEP students and their native English-speaking peers has been reduced by 18 percentage points in reading and 19 percentage points in mathematics.

SUPPORTING DATA:

The achievement gaps in reading and mathematics for some selected student groups are shown below in Tables 11 through 19. Figures 1 through 6 provide graphical displays of the achievement gaps.

QUESTION 4:

How did Rhode Island perform in relation to the annual *statewide performance measures* and goals?

RESPONSE:

To hold itself accountable, the Rhode Island Department of Elementary and Secondary Education established annual performance measures to ensure that progress is being made toward reaching each of its 2014 goals. These goals are based on the *Strategic Education Plan* and the State Scope of Work that is part of our Race to the Top grant. Of the thirty-three performance measures, 14 were met, 8 were nearly met, 9 were not. Two do not have data available at this time.

SUPPORTING DATA:

Progress towards the attainment of each of the established goals for 2010 is shown below in Table 20. In addition, the goals for 2011 through 2014 are presented.

Table 20. Statewide progress toward the attainment of statewide performance measures and goals.

Rhode Island's Annual Performance Measures	2009 Goal	2010 Goal	2010 Actual	Future Goals			
				2011	2012	2013	2014
Students entering the 4th grade will be proficient in <i>reading</i> on NECAP	67%	70%	69%	75%	81%	86%	90%
• <i>The gap between white and black students will be cut in half</i>	27	26	24	24	20	16	13.5
• <i>The gap between white and Hispanic students will be cut in half</i>	28	26	25	23	19	16	14
• <i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	29	27	25	24	20	17	14.5
• <i>The gap between students without IEPs and those with IEPs will be cut in half</i>	50	47	50	42	35	29	25
Students entering the 4th grade will be proficient in <i>mathematics</i> on NECAP	62%	65%	63%	70%	77%	84%	90%
• <i>The gap between white and black students will be cut in half</i>	32	30	27	27	23	19	16
• <i>The gap between white and Hispanic students will be cut in half</i>	32	30	26	27	23	19	16
• <i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	30	28	27	25	21	18	15
• <i>The gap between students without IEPs and those with IEPs will be cut in half</i>	44	41	46	36	30	25	22
Students entering the 8th grade will be proficient in <i>reading</i> on NECAP	70%	73%	74%	77%	82%	87%	90%
• <i>The gap between white and black students will be cut in half</i>	28	26	24	23	19	16	14
• <i>The gap between white and Hispanic students will be cut in half</i>	31	29	29	26	22	18	15.5
• <i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	29	27	26	24	20	17	14.5
• <i>The gap between students without IEPs and those with IEPs will be cut in half</i>	50	47	45	42	35	29	25
Students entering the 8th grade will be proficient in <i>mathematics</i> on NECAP	54%	57%	54%	61%	66%	71%	75%
• <i>The gap between white and black students will be cut in half</i>	34	32	32	29	24	20	17
• <i>The gap between white and Hispanic students will be cut in half</i>	33	31	33	28	23	19	16.5
• <i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	33	31	32	28	23	19	16.5
• <i>The gap between students without IEPs and those with IEPs will be cut in half</i>	47	44	45	39	33	28	23.5
Students entering the 11th grade will be proficient in <i>reading</i> on NECAP	74%	77%	76%	80%	83%	86%	90%
• <i>The gap between white and black students will be cut in half</i>	19	18	26	16	14	12	9.5
• <i>The gap between white and Hispanic students will be cut in half</i>	18	17	24	15	13	11	9
• <i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	19	18	22	16	14	12	8.5
• <i>The gap between students without IEPs and those with IEPs will be cut in half</i>	49	46	48	41	35	30	24.5
Students entering the 11th grade will be proficient in <i>mathematics</i> on NECAP	27%	32%	33%	40%	50%	60%	75%
• <i>The gap between white and black students will be cut in half</i>	27	26	28	24	20	16	13.5
• <i>The gap between white and Hispanic students will be cut in half</i>	25	23	27	21	18	15	12.5
• <i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	23	21	26	19	17	14	11.5
• <i>The gap between students without IEPs and those with IEPs will be cut in half</i>	28	26	32	23	19	16	14
85% of students who first entered 9th grade 4 years prior will graduate from HS	75%	76%	76%	77%	80%	83%	85%
77% of students who graduate from high school will enroll in an institution of higher education (IHE) within 16 months of receiving a diploma	71%	72%	<i>Not Avail.</i>	73%	75%	76%	77%
90% of students who enroll in an institution of higher education (IHE) will complete at least 1 year's worth of credit within two years of enrollment in the IHE	81%	82%	<i>Not Avail.</i>	83%	85%	88%	90%

Key

- = 2010 Performance Measure/Goal was not met.
- = 2010 Performance Measure/Goal was nearly met (within ±2 percentage points).
- = 2010 Performance Measure/Goal was met and/or exceeded.

DISTRICT RESULTS

QUESTION:

How did public school districts in RI perform on the NECAP Reading and Mathematics Assessments?

RESPONSE:

In *reading*, only West Warwick made statistically significant gains while in *mathematics*, 6 districts made statistically significant gains: Beacon Charter; Blackstone Academy; Exeter-West Greenwich; Kingston Hill Academy; Metropolitan Regional Career and Technical Center; and Providence (see Table 21 and Figures 7 and 8). While changes from 2009 to 2010 in reading or mathematics performance in all other districts were not considered statistically significant, 25 districts have made significant improvement in both mathematics and reading achievement compared to their performance back in 2007 (see Table 23).

In *writing*, 7 districts had statistically significant higher percentages than the state in terms of students who scored at or above *Proficient* at all three levels of schooling (elementary, middle, and high school): Barrington; Coventry; East Greenwich; Exeter-West Greenwich; North Smithfield; Scituate; and Smithfield. There were 5 districts that had statistically significant lower percentages than the state at all three levels of schooling: Central Falls; Pawtucket; Providence; RI School for the Deaf; and Woonsocket.

In terms of *high school graduation*, a 4-year graduation rate and a 5-year graduation rate were calculated for each district (see Table 24 and Figures 9 and 10). Looking at 2010 4-year graduation results, 26 districts equaled or bettered the state average of 76%. Results of the 2010 5-year rate results revealed that 25 districts equaled or bettered the state average of 79%.

SUPPORTING DATA:

Statewide district performance in reading, mathematics, and writing are shown below in Tables 21 through 23, and high school graduation rates at the district-level are shown in Table 24. Figures 7 through 10 provide graphical representations of results.

Table 21. Percent of students at/above “Proficient” in reading/math by District (all schl. levels).¹³

¹⁶ Note: The “5-year Rate” is not the same as the “60/40” graduation rate.

SCHOOL-LEVEL ANALYSES

QUESTION:

How did public schools in RI perform on the NECAP Reading and Mathematics Assessments?

RESPONSE:

In **reading** at the *elementary school* level, only 2 schools made statistically significant gains while 3 made statistically significant losses. In **mathematics**, 6 *elementary* schools made statistically significant gains while 2 had statistically significant losses. In **writing**, 27 elementary schools had statistically significant higher percentages than the state in terms of students who scored at or above *Proficient* and 27 elementary schools had statistically significant lower percentages than the state.

In **reading** at the *middle school* level, only 2 schools made statistically significant gains while 1 had a statistically significant percentage point loss. In **mathematics** at the *middle* school level, no schools made statistically significant gains while 1 had a statistically significant percentage point loss. In **writing**, 17 middle schools had statistically significant higher percentages than the state in terms of students who scored at or above *Proficient* and 20 middle schools had statistically significant lower percentages than the state.

In **reading** at the *high school* level, 5 schools made statistically significant gains while 1 had a statistically significant percentage point loss. In **mathematics** at the *high* school level, 9 schools made statistically significant gains while 1 had a statistically significant percentage point loss. In **writing**, 27 elementary, 17 middle, and 20 high schools had statistically significant *higher* percentages than the state in terms of students who scored at or above *Proficient* and 27 elementary, 20 middle, and 18 high schools had statistically significant *lower* percentages than the state.

In terms of **high school graduation**, a 4-year graduation rate and a 5-year graduation rate were calculated for each high school. Looking at 4-year graduation results for 2010, 31 schools equaled or bettered the state average of 76%. Results of the 5-year rate results for 2010 revealed that 34 schools equaled or bettered the state average of 79%.

Finally, although changes in most schools in reading or mathematics performance from 2009 to 2010 were not considered statistically significant, 71 schools have made statistically significant improvement in both mathematics and reading achievement compared to their performance back in 2007, 52 made statistically significant improvement just in reading, 33 made statistically significant improvement just in mathematics, and 127 made no statistically significant improvement in either subject over that same time period.

SUPPORTING DATA:

Tables 25 through 30 delineate results by school level (elementary, middle, and high school), Table 31 provides high school graduation rate results, and Tables 32-35 delineate by individual school performance. See also Appendices E, F, and G.

Appendix H: <i>Percent of high school students “Substantially Below Proficient” in math</i>	51

APPENDIX A

Glossary of Terms

Minimum Cell Size

RIDE Policy on minimum cell size for reporting data stipulates that if $n < 10$ for any group(s) or for any school and district level reporting, then data must be suppressed in public reports.

NECAP Performance Level Descriptors

- ***Proficient with Distinction:*** Students performing at this level demonstrate the prerequisite knowledge and skills needed to participate and excel in instructional activities aligned with the GLEs at the current grade level. Errors made by these students are few and minor and do not reflect gaps in prerequisite knowledge and skills.
- ***Proficient:*** Students performing at this level demonstrate minor gaps in the prerequisite knowledge and skills needed to participate and perform successfully in instructional activities aligned with the GLE at the current grade level. It is likely that any gaps in prerequisite knowledge and skills demonstrated by these students can be addressed during the course of typical classroom instruction.
- ***Partially Proficient:*** Students performing at this level demonstrate gaps in prerequisite knowledge and skills needed to participate and perform successfully in instructional activities aligned with the GLE at the current grade level. Additional instructional support may be necessary for these students to meet grade level expectations.
- ***Substantially Below Proficient:*** Students performing at this level demonstrate extensive and significant gaps in prerequisite knowledge and skills needed to participate and perform successfully in instructional activities aligned with the GLE at the current grade level. Additional instructional support is necessary for these students to meet grade level expectations.

APPENDIX B

Standard Error (SE)

For the purposes of this report, *Standard Error* (SE) is defined as a measurement of the standard error of a percentage (e.g., % *Proficient*, used throughout this report). Mathematically, SE's were calculated as follows:

$(SE) = \sqrt{\left(\frac{pq}{N}\right)}$, where p is the percent of students who are proficient, $q = (100-p)$ and N is the population or group size.

It is important to note that the derived SE is based on the size of the group being examined and its respective performance (read: % *Proficient*) on the NECAP tests. Standard errors can be used to create a confidence interval around the derived percentage so that you can see the range in which the “true” (e.g., measured without error) value is located. To do so, you can take the SE and multiply it by 1.96 (for a 95% confidence interval). The resultant product is then added and subtracted from the percent proficient, p , for example, to create a range of values in which you can be 95% confident that the “true” value is located. For example, viewing p as the center point, if one adds the value of $SE(1.96)$ to p and also subtracts this value from p , then the full confidence interval is created with both an upper and lower boundary. So, if the percent proficient, p equals 70% and SE equals .5, then $SE(1.96)$ equals $.5(1.96)$ or .965. Adding and subtracting this number from 70% creates the confidence interval, which ranges from 69.04% to 70.97%. This is the range in which one can be 95% confident that the “true” value exists.

When comparing the performance of any two years or groups, we say that the difference in performance between the groups is *statistically significant* if the difference in performance between the two groups is larger than the sum of the SE's of the two groups. In other words, if the sum of the two SE's is larger than the value of the difference in performance between the two groups, then we say the difference is too small to be significant or meaningful because the difference doesn't fall outside of the range of plausible “true” values. For example, let's say that 60% of 4th grade students at School X were proficient in reading in 2009 and in 2010, 68% of 4th grade students were proficient, resulting in a difference in performance of +8 percentage points. If the sum of the 2009 $SE(1.96)$ and the 2010 $SE(1.96)$ is only 6.5, then the change from 2009 to 2010 in 4th grade reading performance at School X is not large enough to be considered statistically significant.

APPENDIX C

Split- Level Schools for Reporting

Schools with the asterisk (*) indicator span more than one level of schooling (e.g. elementary and middle). As such, school-level data posted in tables in this report may *not* match data sent to schools from Measured Progress. This is *not* an indication that the posted data are incorrect. Rather, it is a matter of RIDE classifying schools in accordance with school levels reported by the local education agency (LEA). Below is a list of these schools:

Wilbur and McMahon School, Little Compton

Elementary	Grades 03, 04, 05
Middle	Grades 06, 07, 08

Block Island School, New Shoreham

Elementary	Grades 03, 04,05,06,07
High	Grades 08, 11

Times 2 Academy

Elementary	Grades 03, 04, 05, 06
Middle	Grades 07, 08
High	Grade 11

Highlander Charter School

Elementary	Grades 03, 04
Middle	Grades 05, 06, 07, 08

Paul Cuffee Charter School

Elementary	Grades 03, 04, 05
Middle	Grades 06, 07, 08

Rhode Island School for the Deaf

Elementary	Grades 03, 04, 05
Middle	Grades 06, 07, 08
High	Grade 11

The RYSE School

Middle	Grades 07, 08
High	Grade 11

APPENDIX D

2010 Rhode Island State-level NECAP *reading, mathematics, and writing* strand scores

Key

- SE = Standard error (see Appendix B)
- = Statistically significant decrease in the percent of students Substantially Below Proficient from 2009 to 2010 NECAP results
- = No statistically significant change in the percent of students Substantially Below Proficient from 2009 to 2010 NECAP results

Note: With the exception of standard errors, all numbers have been rounded to the nearest whole number.
