

Rhode Island's NECAP Math, Reading, and Writing Results for Grades 3-8 & 11

October 2013 Test Administration

Supplemental Data: Class of 2013 High School Graduation Rates

Deborah A. Gist, Commissioner

Rhode Island Department of Elementary and Secondary Education

255 Westminster Street

Providence, RI 02903

(401) 222-4600

[v.02.13.14]

NOTE 1: The New England Common Assessment Program (NECAP) is the result of collaboration among Maine, New Hampshire, Rhode Island, and Vermont to build a set of tests for grades 3 through 8 and 11 to meet the requirements of the No Child Left Behind Act (NCLB). The purposes of the NECAP tests are as follows: (1) provide data on student achievement in reading/language arts and mathematics to meet the requirements of NCLB; (2) provide information to support program evaluation and improvement; (3) provide information regarding student and school performance to both parents and the public; and (4) provide information to support graduation readiness decisions. The tests are constructed to meet rigorous technical criteria, to include universal design elements and accommodations to allow all students access to test content, and to gather reliable student demographic information for accurate reporting. It is important to note that NECAP results are provided to districts, schools, and families for use as one piece of evidence about progress and learning that occurred on the *prior year's* grade-level expectations (GLEs) of elementary and middle schools and the grade-span expectations (GSEs) of high schools.

NOTE 2: The NECAP tests in reading, mathematics, and writing are administered each fall and assess student achievement based on the *prior year's* GLEs/GSEs for students in grades 3 through 8. For example, the NECAP Grade 5 tests assess student performance on the Grade 4 GLEs. For Grade 11, the NECAP Mathematics test measures mathematics GSEs for grades 9 and 10 and the Reading test measures the ELA GSEs for grades 9 and 10. NECAP school- and district-level Mathematics, Reading, and Writing reports are available in two ways: "testing-year" and "teaching-year." Testing-year results are those of the school and district in which students took their NECAP tests in the fall of the *current* school year whereas teaching-year results are those of the school and district in which students received instruction during the *prior* school year. Throughout this report, **all NECAP results data are reported according to testing-year** as opposed to *teaching-year*. Therefore it is important to note that results in this report are reflective of **student performance** and not necessarily **school or district performance**. This is an important distinction for middle schools and charter schools in particular as incoming students received instruction on the GLEs being assessed in another school.

NOTE 3: Throughout this report, **statistical significance** is reported to indicate whether reported differences (e.g., increases or decreases in the percentage of students achieving *proficiency* or higher) in this year's NECAP results are *significantly* different from results reported in previous years. For each table presented in this report, please note the key to determine the meaning of color-coded cells. In general, if a cell is colored **green**, then the reported difference indicates that the percentage of students achieving *proficiency* or higher, for example, is statistically significantly **higher** than previous results whereas if the cell is **red**, then the reported difference indicates that the percentage of students achieving *proficiency* or higher is statistically significantly **lower** than previous results. All other reported differences are thus not considered statistically significant, regardless of how large or small they appear to be. Please see Appendix B for a full discussion on how statistical significance was calculated and how to interpret statistical significance.

NOTE 4: Throughout this report, with the exception of Standard Errors (SE) and *n* sizes (e.g. number of students tested), all numbers have been rounded to the nearest whole number.

NOTE 5: Throughout this report, the percentage of students scoring *Proficient* or higher refers to the cumulative percentage of students scoring at the *Proficient* and *Proficient with Distinction* levels of achievement. See Appendix A for descriptions of each of the levels.

EXECUTIVE SUMMARY

The ninth¹ administration of the New England Common Assessment Program (NECAP) tests took place in October, 2013. A total of 73,683 Rhode Island public school students in grades three through eight and eleven participated in NECAP Reading and Mathematics tests and 30,693 students participated in NECAP Writing tests.² This year Rhode Island students in eleventh grade fared well compared to their peers³ in New Hampshire and Vermont⁴ improving two percentage points (from 79% to 81%) in Reading proficiency and two percentage points (from 34% to 36%) in Mathematics proficiency. By comparison, New Hampshire's Grade 11 Reading scores remained constant (77%) and Mathematics scores went down one percentage point (from 38% to 37%) while Vermont's Reading scores remained constant (74%) in Reading and Mathematics scores went down three points (from 38% to 35%). It bears noting that this year's Grade 11 Reading test results marks the third time since 2007 that Rhode Island's students outperformed their peers in both New Hampshire and Vermont on this test on this test. For the aggregated group of third through eighth grade students across all NECAP states, results were lower compared to last year's Reading and Mathematics results.⁵

STATE-LEVEL RESULTS

Overall Achievement

Overall, achievement in Reading is somewhat consistent with last year's performance. The percentage of students scoring *Proficient* or higher this year *increased* at Grade 11 and *decreased* in Grades 7 and 8. For all other grades, Reading scores were not significantly different from last year. In Mathematics, the percentage of students scoring *Proficient* or higher *decreased* in Grades 3, 4, and 6 but remained stable in all other grades.

Trends in Achievement⁶

Because measures of student achievement often change incrementally over short periods of time, RIDE presents most state-, district/LEA, and school-level results in this report as a series of five-year views in order to reveal achievement trends that have occurred over multiple years. In addition, RIDE presents last year's results to illustrate a one-year view. In general, over the five-

¹ The ninth administration of the NECAP tests for students in Grades 3 through 8 and the seventh administration for students in Grade 11 took place this past fall, October 1-23, 2013.

² All tested grades (3-8 and 11) administer the Reading and Mathematics tests while only Grades 5, 8, and 11 administer the Writing test.

³ Maine only administers NECAP tests to students in Grades 3 through 8 and not to students in Grade 11.

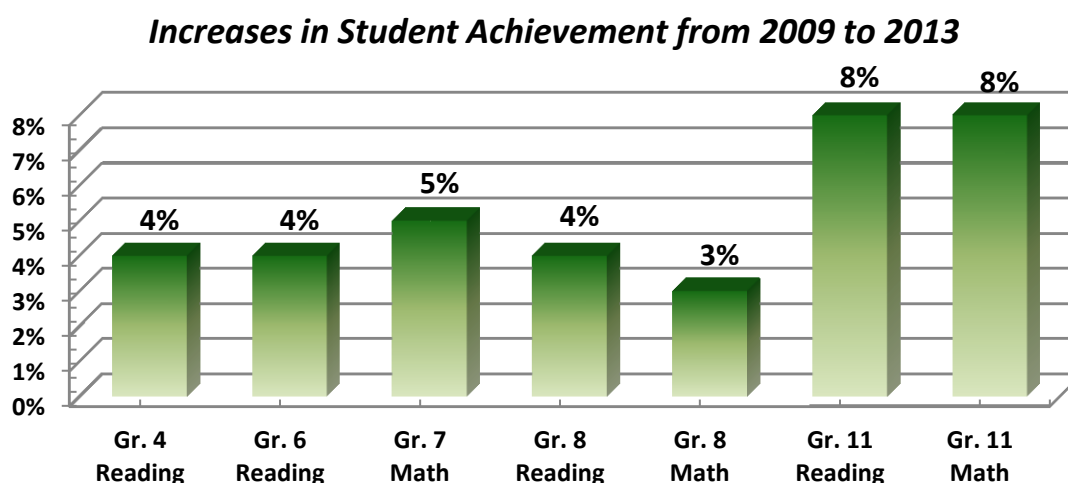

⁴ In Vermont, 27 schools participated in Smarter Balanced field testing in lieu of administering the fall NECAP assessments this year. While the state is required to report statewide results, there is evidence to suggest that the exclusion of these 27 schools makes statewide results unrepresentative of all students in the state. Go to <http://education.vermont.gov/assessment/data> for details.

⁵ Note that for state-by-state comparisons, results for Grades 3 through 8 are aggregated to produce a single number for comparison purposes.

⁶ Multiple data points are needed for trend analysis. A single year's test results provide limited information about a school or district. As with any evaluation, test results are most meaningful when compared with other indicators and when examined over several years for long-term trends in student performance. This is especially true in small schools where changes in student cohorts from year to year can have a noticeable influence on test results.

year period from 2009 to 2013, a *statistically significant*⁷ increase indicates improvement that has been sustained. Conversely, a statistically significant decrease indicates a sustained decline in achievement.

For most grade levels there were notable increases in achievement in Reading and Mathematics over the past five years.⁸ The bar graph below provides a quick overview of the grades with significant improvements.

The five-year increases in student achievement shown above include:

In READING:

- Fourth grade increased from 67 to 71 percent *Proficient* or higher.
- Sixth grade increased from 68 to 72 percent *Proficient* or higher.
- Eighth grade increased from 70 to 74 percent *Proficient* or higher.
- Eleventh grade increased from 73 to 81 percent *Proficient* or higher.

In MATHEMATICS:

- Seventh grade increased from 54 to 59 percent *Proficient* or higher.
- Eighth grade increased from 54 to 57 percent *Proficient* or higher.
- Eleventh grade increased from 27 to 36 percent *Proficient* or higher.

It bears noting that third grade students' performance on the 2013 Reading test was significantly *lower* this year compared to 2009. Fifth grade students' 2013 performance on both the Reading and Mathematics tests was not significantly different than five years ago. Finally, seventh grade student achievement on the Reading test and fourth and sixth grade student achievement on the Mathematics test were not statistically significantly different than in 2009.⁹

⁷ See Appendix B for details.

⁸ See Tables 1 and 2.

⁹ See Tables 4 and 5.

Student Group Performance and Achievement Gaps^{10, 11}

For most student groups there were notable achievement gains in Reading and Mathematics over the past five years.¹²

In Reading:

- Black, Hispanic, and White students all improved 4 percentage points since 2009
- Low-Income students also posted a 4 percentage point gain since 2009
 - ❖ Achievement gaps continue to narrow at all grade levels for this student group, especially at Grade 11 where the gap is at an all-time low (16 percentage points compared to 25 percentage points in 2007)
- LEP students' performance has remained essentially unchanged since 2009
 - ❖ Achievement gaps between LEP and Non-LEP students have generally widened in all grades except third and fourth, where the gap has narrowed since 2005
 - ❖ The widest gap continues to be found at 11th grade, where it has widened to 70 percentage points
- LEP-Monitored¹³ students improved 18 percentage points since 2009
- Students with IEPs' performance has remained essentially unchanged since 2009
 - ❖ Achievement gaps between student with IEPs and students without IEPs continue a general widening trend at most grade levels

In Mathematics:

- Black, Hispanic, and White students all improved 4 percentage points since 2009
- Low-Income students had a 3 percentage point gain since 2009
 - ❖ Achievement gaps are continuing to narrow at most grade levels between Low-Income and Non-Low Income students
- LEP students posted a 3 percentage point decrease since 2009
 - ❖ Achievement gaps between LEP and Non-LEP students have generally continued to widen in all grades except 3rd, where the gap continues to narrow
- LEP-Monitored¹⁴ students improved 15 percentage points since 2009
- Students with IEPs posted a 3 percentage point decrease since 2009
 - ❖ Achievement gaps between student with IEPs and students without IEPs continue a general widening trend at all grade levels

¹⁰ An achievement gap is a difference in what distinct groups of students know and can do in important subjects such as reading or math. To find achievement gaps, we compare test scores for groups of students. One way we describe gaps is by subtracting the average of a lower scoring group from the average of a higher scoring group.

¹¹ See Tables 13 and 14.

¹² See Tables 11 and 12.

¹³ LEP students are classified as *monitor year one* during the first full school year following exit from an English language instructional program and *monitor year two* during the following year. Both categories are combined for this report to present results for "LEP-Monitored" students.

¹⁴ LEP students are classified as *monitor year one* during the first full school year following exit from an English language instructional program and *monitor year two* during the following year. Both categories are combined for this report to present results for "LEP-Monitored" students.

DISTRICT/LEA-LEVEL RESULTS¹⁵

There was very little change in student achievement results in Reading or Mathematics at the district/LEA-level this year. Only one of Rhode Island's 55 districts/LEAs posted a significant gain in Reading and one posted a significant drop. The same is true for Mathematics. For all other districts/LEAs, scores in both Reading and Mathematics were essentially the same as last year. Over the five-year period from 2009 to 2013, however there were seven districts/LEAs that posted significant gains in both Reading *and* Mathematics and thirteen that posted significant gains in either Reading or Mathematics. Only one district posted significant losses in both subjects since 2009.

SCHOOL-LEVEL RESULTS¹⁶

Results at the school level mirrored those of district/LEA-level in that for the vast majority, Reading and Mathematics results were not significantly different than last year's. A total of four schools posted significant increases in the percentage of students achieving proficiency or above in Reading while four posted significant decreases. For Mathematics, four schools posted significant gains while five posted losses. Over the five-year period from 2009 to 2013, there were a large number of schools that posted gains in Reading and Mathematics. In Reading, 50 schools made gains while six schools had lower percentages. In Mathematics, 38 schools had significantly higher percentages while only five had significantly lower percentages.

¹⁵ See Table 16.

¹⁶ See Table 20.

STATE-LEVEL RESULTS¹⁷

¹⁹ Maine does not administer the NECAP Reading assessment at the high school level.

²⁰ Vermont’s asterisks (*) indicate that 27 schools participated in Smarter Balanced field testing in lieu of administering the fall NECAP assessments this year. While the state is required to report statewide results, there is evidence to suggest that the exclusion of these 27 schools makes statewide results unrepresentative of all students in the state. Go to <http://education.vermont.gov/assessment/data> for details.

²¹ Maine does not administer the NECAP Mathematics assessment at the high school level.

²² Vermont’s asterisks (*) indicate that 27 schools participated in Smarter Balanced field testing in lieu of administering the fall NECAP assessments this year. While the state is required to report statewide results, there is evidence to suggest that the exclusion of these 27 schools makes statewide results unrepresentative of all students in the state. Go to <http://education.vermont.gov/assessment/data> for details.

²³ Maine does not administer the NECAP Writing assessment at the high school level.

²⁴ Vermont’s asterisks (*) indicate that 27 schools participated in Smarter Balanced field testing in lieu of administering the fall NECAP assessments this year. While the state is required to report statewide results, there is evidence to suggest that the exclusion of these 27 schools makes statewide results unrepresentative of all students in the state. Go to <http://education.vermont.gov/assessment/data> for details.

³⁰ Eligibility for free or reduced price meal benefits through the National School Lunch Program is the most commonly used indicator of economic disadvantage.

³¹ An achievement gap is a difference in what distinct groups of students know and can do in important subjects such as reading or math. One way we find achievement gaps is by comparing test scores for groups of students. One way we describe gaps is by subtracting the average of a lower scoring group from the average of a higher scoring group.

³² NECAP Reading tests were not administered in grade 11 until 2007.

³³ NECAP Mathematics tests were not administered in grade 11 until 2007.

Table 15. Statewide Progress toward Attainment of RIDE Performance Measures and Goals.

RHODE ISLAND'S ANNUAL PERFORMANCE MEASURES	2012 Goal	2012 Actual	2013 Goal	2013 Actual
Students entering the 4 th grade will be proficient in <u>reading</u> on NECAP	81%	69.2	86	70.8
<i>The gap between white and black students will be cut in half</i>	20	25.7	16	22.8
<i>The gap between white and Hispanic students will be cut in half</i>	19	29.3	16	24.0
<i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	20	28.5	17	24.8
<i>The gap between students without IEPs and those with IEPs will be cut in half</i>	35	50.5	29	56.8
Students entering the 4 th grade will be proficient in <u>mathematics</u> on NECAP	77%	64.5	84	62.5
<i>The gap between white and black students will be cut in half</i>	23	31.0	19	31.1
<i>The gap between white and Hispanic students will be cut in half</i>	23	30.2	19	29.7
<i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	21	29.6	18	29.6
<i>The gap between students without IEPs and those with IEPs will be cut in half</i>	30	48.4	25	47.9
Students entering the 8 th grade will be proficient in <u>reading</u> on NECAP	82%	77.2	87	74.2
<i>The gap between white and black students will be cut in half</i>	19	20.7	16	23.5
<i>The gap between white and Hispanic students will be cut in half</i>	22	26.2	18	28.0
<i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	20	23.5	17	24.9
<i>The gap between students without IEPs and those with IEPs will be cut in half</i>	35	49.4	29	49.7
Students entering the 8 th grade will be proficient in <u>mathematics</u> on NECAP	66%	58.1	71	57.3
<i>The gap between white and black students will be cut in half</i>	24	30.6	20	32.1
<i>The gap between white and Hispanic students will be cut in half</i>	23	33.0	19	31.2
<i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	23	32.7	19	31.8
<i>The gap between students without IEPs and those with IEPs will be cut in half</i>	33	51.0	28	50.9
Students entering the 11 th grade will be proficient in <u>reading</u> on NECAP	83%	78.6	86	81.5
<i>The gap between white and black students will be cut in half</i>	14	26.9	12	24.0
<i>The gap between white and Hispanic students will be cut in half</i>	13	27.1	11	22.7
<i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	14	21.3	12	16.1
<i>The gap between students without IEPs and those with IEPs will be cut in half</i>	35	47.1	30	42.4
Students entering the 11 th grade will be proficient in <u>mathematics</u> on NECAP	50%	34.0	60	35.7
<i>The gap between white and black students will be cut in half</i>	20	28.3	16	32.0
<i>The gap between white and Hispanic students will be cut in half</i>	18	29.2	15	28.7
<i>The gap between non-economically disadvantaged students and economically disadvantaged students will be cut in half</i>	17	26.6	14	26.9
<i>The gap between students without IEPs and those with IEPs will be cut in half</i>	19	34.0	16	35.1
85% of students who first entered 9th grade 4 years prior will graduate from HS	80%	77.1	83	79.7
77% of students who graduate from high school will enroll in an institution of higher education (IHE) within 16 months of receiving a diploma	75%	62.8	76	66.6
70% of high school students who enroll in an institution of higher education (IHE) within 16 months of graduation will complete at least 1 year's worth of credit within 2 years of enrollment in the IHE	65%	75.7	68	82.3

Key

- = Performance Measure/Goal was not met.
- = Performance Measure/Goal was not met but improvement shown compared to previous year.
- = Performance Measure/Goal was nearly met (within ±2 percentage points).
- = Performance Measure/Goal was met and/or exceeded.

Key

SE = Standard Error (see Appendix B)

■ = Statistically significant *decrease* in percent of students proficient or above in 2013 compared to 2012 or 2009 NECAP results

■ = Statistically significant *increase* in percent of students proficient or above in 2013 compared to 2012 or 2009 NECAP results

□ = No statistically significant difference between 2013 and 2012 or 2009 NECAP results

Blank = Number of students tested is less than 10 and/or percentage is less than 1% or greater than 99% (see Appendix A for "Minimum Cell Size" Reporting Policy)

n/a = District/LEA not open, results not available.

³⁷ Due to rounding, data in "Difference" columns may not equal the difference between "%P+PwD" for each year.

³⁸ "District Performance Reference" represents each district's average of the percentage of "non-LEP," "non-Low Income," and "non-IEP" students who achieved *Proficiency* or above on the NECAP Reading test. Due to small n's of "non-LEP," "non-Low Income," and "non-IEP" students at the RI School for the Deaf and DCYF, their respective *District Performance References* are derived from the Providence Public Schools, which is the district in both schools are located.

Key

n = Number of students tested

P+PwD = Proficient + Proficient with Distinction. This value represents the total percentage of students who achieved Proficiency or above

n/a = Student group not enrolled

blank = Number of students is less than 10 and/or the percentage is less than 1% or greater than 99% (see Appendix A for "Minimum Cell Size" Reporting Policy)

³⁹ Due to rounding, data in “Difference” columns may not equal the difference between “%P+PwD” for each year.

⁴⁰ “District Performance Reference” represents each district’s average of the percentage of “non-LEP,” “non-Low Income,” and “non-IEP” students who achieved *Proficiency* or above on the NECAP Mathematics test. Due to small n’s of “non-LEP,” “non-Low Income,” and “non-IEP” students at the RI School for the Deaf and DCYF, their respective *District Performance References* are derived from the Providence Public Schools, which is the district in both schools are located.

Key

- = Statistically significant *decrease* in percent of students proficient or above in 2013 compared to 2012 or 2009 NECAP results
- = Statistically significant *increase* in percent of students proficient or above in 2013 compared to 2012 or 2009 NECAP results
- = No statistically significant difference between 2013 and 2012 or 2009 NECAP results
- Blank = Number of students tested is less than 10 and/or the percentage is less than 1% or greater than 99% (see Appendix A for "Minimum Cell Size" Reporting Policy)
- n/a = Results not available
- SE = Standard Error (see Appendix B)

APPENDIX A

Glossary of Terms

Graduation Rate

- The *Four-Year Graduation Rate* yields the percentage of students who enrolled in the 9th grade for the first time and graduated from high school four years later. To calculate the 4-year graduation rate, RIDE tracks an *Adjusted Cohort*⁴³ of students from 9th grade through high school and then divides the number of students who graduate within four years by the total number in the cohort. In other words, the rate provides the percentage of the cohort that graduates in four years or fewer.
- The *Five-Year Graduation Rate* yields total percentage the *Adjusted Cohort* of students who graduate within 5 years of entering 9th grade for the first time. This rate includes students from the Adjusted Cohort who graduate within 4 years as well as those who graduate within 5 years.
- The *Six-Year Graduation Rate* yields the total percentage of the *Adjusted Cohort* of students who graduate within 6 years of entering 9th grade for the first time. This rate includes students from the Adjusted Cohort who graduate within 4 years and those who graduate within 5 years as well as those who graduate within 6 years.

“Minimum Cell Size” Reporting Policy

RIDE Policy on minimum cell size for reporting data stipulates that if the number of students is less than 10 for any group(s) or for any school- and district-level reporting or if a percentage is less than 1% or greater than 99%, then data must be suppressed in public reports to ensure confidentiality of individual student results and to discourage generalizations about school performance based on very small populations. Throughout this report, empty cells indicate that the number of students included in calculations was less than 10 or the percentage was less than 1% or greater than 99%.

NECAP Performance Level Descriptors: *General*

- ***Proficient with Distinction (Level 4)***: Students performing at this level demonstrate the prerequisite knowledge and skills needed to participate and excel in instructional activities aligned with the GLEs at the current grade level. Errors made by these students are few and minor and do not reflect gaps in prerequisite knowledge and skills.
- ***Proficient (Level 3)***: Students performing at this level demonstrate minor gaps in the prerequisite knowledge and skills needed to participate and perform successfully in instructional activities aligned with the GLE at the current grade level. It is likely that

⁴³ The “Adjusted Cohort” of students includes those who enter ninth grade for the first time plus transfers *in* and transfers *out* as they progress through high school toward graduation.

any gaps in prerequisite knowledge and skills demonstrated by these students can be addressed during the course of typical classroom instruction.

- **Partially Proficient (Level 2):** Students performing at this level demonstrate gaps in prerequisite knowledge and skills needed to participate and perform successfully in instructional activities aligned with the GLE at the current grade level. Additional instructional support may be necessary for these students to meet grade level expectations.
- **Substantially Below Proficient (Level 1):** Students performing at this level demonstrate extensive and significant gaps in prerequisite knowledge and skills needed to participate and perform successfully in instructional activities aligned with the GLE at the current grade level. Additional instructional support is necessary for these students to meet grade level expectations.

NECAP Performance Level Descriptors: READING

- **Proficient with Distinction (Level 4):** Student's performance demonstrates an ability to read and comprehend grade-appropriate text. Student is able to analyze and interpret literary and informational text. Student offers insightful observations/assertions that are well supported by references to the text. Student uses range of vocabulary strategies and breadth of vocabulary knowledge to read and comprehend a wide variety of texts.
- **Proficient (Level 3):** Student's performance demonstrates an ability to read and comprehend grade-appropriate text. Student is able to analyze and interpret literary and informational text. Student makes and supports relevant assertions by referencing text. Student uses vocabulary strategies and breadth of vocabulary knowledge to read and comprehend text.
- **Partially Proficient (Level 2):** Student's performance demonstrates an inconsistent ability to read and comprehend grade-appropriate text. Student attempts to analyze and interpret literary and informational text. Student may make and/or support assertions by referencing text. Student's vocabulary knowledge and use of strategies may be limited and may impact the ability to read and comprehend text.
- **Substantially Below Proficient (Level 1):** Student's performance demonstrates minimal ability to derive/construct meaning from grade-appropriate text. Student may be able to recognize story elements and text features. Student's limited vocabulary knowledge and use of strategies impacts the ability to read and comprehend text.

NECAP Performance Level Descriptors: MATHEMATICS

- **Proficient with Distinction (Level 4):** Student's problem solving demonstrates logical reasoning with strong explanations that include both words and proper mathematical notation. Student's work exhibits a high level of accuracy, effective use of a variety of strategies, and an understanding of mathematical concepts within and across grade level expectations. Student demonstrates the ability to move from concrete to abstract representations.

- **Proficient (Level 3):** Student's problem solving demonstrates logical reasoning with appropriate explanations that include both words and proper mathematical notation. Student uses a variety of strategies that are often systematic. Computational errors do not interfere with communicating understanding. Student demonstrates conceptual understanding of most aspects of the grade level expectations.
- **Partially Proficient (Level 2):** Student's problem solving demonstrates logical reasoning and conceptual understanding in some, but not all, aspects of the grade level expectations. Many problems are started correctly, but computational errors may get in the way of completing some aspects of the problem. Student uses some effective strategies. Student's work demonstrates that he or she is generally stronger with concrete than abstract situations.
- **Substantially Below Proficient (Level 1):** Student's problem solving is often incomplete, lacks logical reasoning and accuracy, and shows little conceptual understanding in most aspects of the grade level expectations. Student is able to start some problems but computational errors and lack of conceptual understanding interfere with solving problems successfully.

NECAP Performance Level Descriptors: WRITING

- **Proficient with Distinction (Level 4):** Student's writing demonstrates an ability to respond to prompt/task with clarity and insight. Focus is well developed and maintained throughout response. Response demonstrates use of strong organizational structures. A variety of elaboration strategies is evident. Sentence structures and language choices are varied and used effectively. Response demonstrates control of conventions; minor errors may occur.
- **Proficient (Level 3):** Student's writing demonstrates an ability to respond to prompt/task. Focus is clear and maintained throughout the response. Response is organized with a beginning, middle and end with appropriate transitions. Details are sufficiently elaborated to support focus. Sentence structures and language use are varied. Response demonstrates control of conventions; errors may occur but do not interfere with meaning.
- **Partially Proficient (Level 2):** Student's writing demonstrates an attempt to respond to prompt/task. Focus may be present but not maintained. Organizational structure is inconsistent with limited use of transitions. Details may be listed and lack elaboration. Sentence structures and language use are unsophisticated and may be repetitive. Response demonstrates inconsistent control of conventions.
- **Substantially Below Proficient (Level 1):** Student's writing demonstrates a minimal response to prompt/task. Focus is unclear or lacking. Little or no organizational structure is evident. Details are minimal and/or random. Sentence structures and language use are minimal or absent. Frequent errors in conventions may interfere with meaning.

APPENDIX B

Calculating Standard Error (SE)

For the purposes of this report, *Standard Error* (SE) is defined as a measurement of the standard error of a percentage (e.g., % *Proficient*, used throughout this report). Mathematically, SE's were calculated as follows:

$(SE) = \sqrt{\left(\frac{pq}{N}\right)}$, where p is the percent of students who are proficient, $q = (100-p)$ and N is the population or group size.

It is important to note that the derived SE is based on the size of the group being examined and its respective performance (read: % *Proficient*) on the NECAP tests. Standard errors can be used to create a confidence interval around the derived percentage so that you can see the range in which the “true” (e.g., measured without error) value is located. To do so, you can take the SE and multiply it by 1.96 (for a 95% confidence interval). The resultant product is then added and subtracted from the percent proficient, p , for example, to create a range of values in which you can be 95% confident that the “true” value is located. For example, viewing the percent proficient (p) as the center point, if one adds the value of $SE(1.96)$ to p and also subtracts this value from p , then the full confidence interval is created with both an upper and lower boundary. So, if p equals 70% and the SE equals .5, then the product of SE and 1.96 equals $.5(1.96)$ or .965. Adding and subtracting this number from 70% creates the confidence interval, which ranges from 69.04% to 70.97%. This is the range in which one can be 95% confident that the “true” value exists.

When comparing the performance of any two years or groups, we say that the difference in performance between the groups is *statistically significant* if the difference in performance between the two groups is larger than the sum of the SE's of the two groups. In other words, if the sum of the two SE's—each multiplied by 1.96 to get the 95% confidence interval—is larger than the value of the difference in performance between the two groups, then we say the difference is too small to be significant or meaningful because the difference doesn't fall outside of the range of plausible “true” values. To illustrate this point, let's say that 60% of 4th grade students at *School X* were proficient or above in reading in 2011 and the following year in 2012, 66% of 4th grade students were proficient or above, thus resulting in an increase of +6 percentage points. If the sum of the 2011 $SE(1.96)$ and the 2012 $SE(1.96)$ is 6.5, then the change from 2011 to 2012 in 4th grade reading performance of +6 percentage points at *School X* is not large enough to be considered statistically significant. On the other hand, if 67% of 4th graders in 2011 were proficient or above, then the +7 percentage point increase in performance would be larger than the standard error of 6.5 and this difference would be statistically significant.

APPENDIX C

High School Graduation Rates by District/LEA: Class of 2010 to Class of 2013⁴⁴

⁴⁴ The Class of 2010 includes traditional four-year student graduation rates (blue column), five-year rates of the 2009 *adjusted cohort* (purple column) and six-year rates of the 2008 *adjusted cohort* (gray column). To see how the 2010 *adjusted cohort* of students fared (students who entered as freshman in the 2006-07 school year), you must look across the three years, (2010, 2011 and 2012) and by four-year, five-year and six-year rates, respectively. All cohorts are color-coded: the Cohort of 2009 is shaded in purple; the Cohort of 2010 is shaded in blue; the Cohort of 2011 is shaded in orange; and the Cohort of 2012 is shaded in green. Under the Class of 2013, one column is un-shaded to represent the four-year graduation rate for the 2013 cohort. See Appendix A for descriptions of each graduation rate and of how cohorts are "adjusted."

APPENDIX E

NECAP Writing Assessment Design

The NECAP Writing Assessment is designed to measure students' ability to produce extended writing samples. This approach maintains our commitment to measuring actual writing rather than merely indicators of writing ability gathered by answering multiple-choice questions. By designing a test that asks fewer, but more involved questions that require more time to answer, the NECAP writing test yields fewer total points than a test that could be given in the same amount of time with all multiple-choice items. This poses some technical challenges that also need to be considered when interpreting results, but we believe that this is appropriate in order to obtain results of students' actual writing. The smaller number of possible points on the writing tests complicates the ability of the test to produce stable achievement level results from year to year. For this reason results are reported to examine within-year achievement at the school, district, and state level as opposed to across-year comparisons.
