# Introduction

Student results on the RICAS tests are reported according to four achievement levels: Exceeding Expectations, Meeting Expectations, Partially Meeting Expectations, and Not Meeting Expectations. The descriptors in this document illustrate the knowledge and skills students demonstrate on RICAS at each achievement level in that content area for their grade level. Knowledge and skills are cumulative at each level. No descriptors are provided for the Not Meeting Expectations achievement level because students' work at this level, by definition, does not meet the criteria of the Partially Meeting Expectations level.

## Scale Scores and Performance Levels.

RICAS uses four performance levels that describe how well student(s) meet the expectations for their grade level. The performance levels correspond to particular ranges for the scale scores that students receive, from 440 to 560.

- **Exceeding Expectations (530-560):** A student who performed at this level exceeded grade-level expectations by demonstrating mastery of the subject matter.
- **Meeting Expectations (500-529):** A student who performed at this level met grade-level expectations and is academically on-track to succeed in the current grade in this subject.
- **Partially Meeting Expectations (470-499):** A student who performed at this level partially met grade-level expectations in this subject. The school, in consultation with the student's parent/guardian, should consider whether the student needs additional academic assistance to succeed in this subject.
- **Not Meeting Expectations (440-469):** A student who performed at this level did not meet grade-level expectations in this subject. The school, in consultation with the student's parent/guardian, should determine the coordinated academic assistance and/or additional instruction the student needs to succeed in this subject.

### Grade 3 RICAS Achievement Level Descriptors

Grade 3	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Conceptual Understanding and Procedural Knowledge</b>	<ul style="list-style-type: none"> <li>• Demonstrates partial understanding of the grade appropriate numeration system</li> <li>• Performs some calculations and estimations</li> <li>• Identifies examples of basic math facts or mathematical concepts</li> <li>• Mostly reads and sometimes constructs graphs, tables and charts</li> </ul>	<ul style="list-style-type: none"> <li>• Applies understanding of the base-ten system and fractions to interpret numbers and solve problems</li> <li>• Performs most calculations and estimations</li> <li>• Describes mathematical concepts and generates examples and counterexamples of concepts</li> <li>• Represents data and mathematical relationships using equations, verbal descriptions, tables, and graphs</li> </ul>	<ul style="list-style-type: none"> <li>• Performs complex calculations and estimations</li> <li>• Selects the best representations for a given set of data</li> <li>• Explains relationships between models such as equations, verbal descriptions, tables, and graphs</li> <li>• Applies math facts and connects mathematical concepts from various areas of mathematics, and uses the concepts to develop generalizations</li> <li>• Recognizes and makes use of structure, discerning patterns by seeing complicated things as single objects</li> </ul>
<b>Problem Solving</b>	<ul style="list-style-type: none"> <li>• Applies learned procedures to solve routine problems</li> <li>• Uses concrete objects or pictures to help conceptualize and solve problems.</li> </ul>	<ul style="list-style-type: none"> <li>• Applies learned procedures and mathematical concepts to solve a variety of problems, including multi-step problems</li> <li>• Solves problems using multiple methods</li> <li>• Demonstrates the relationships between operations used to solve problems and the context of the problems</li> </ul>	<ul style="list-style-type: none"> <li>• Generates strategies and procedures to solve non-routine problems</li> <li>• Solves problems using multiple methods, evaluating reasonableness of intermediate steps leading to the standard algorithms</li> <li>• Draws connections between strategies</li> <li>• Analyzes givens, constraints, and relationships in problems, using multiple methods and appropriate tools</li> </ul>

### Grade 3 RICAS Achievement Level Descriptors

Grade 3	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Mathematical Reasoning</b>	<ul style="list-style-type: none"> <li>Applies some reasoning methods to solve routine problems</li> </ul>	<ul style="list-style-type: none"> <li>Uses a variety of reasoning methods to solve routine and non-routine problems</li> <li>Uses symbols to solve routine mathematical problems</li> </ul>	<ul style="list-style-type: none"> <li>Reasons abstractly and quantitatively, using multiple reasoning methods to solve complex problems and provides justification for the reasoning</li> <li>Decontextualizes situations and represents them symbolically</li> </ul>
<b>Mathematical Communication</b>	<ul style="list-style-type: none"> <li>Identifies and uses basic terms</li> </ul>	<ul style="list-style-type: none"> <li>Uses logical forms of representation (e.g., text, graphs, symbols) to illustrate steps to a solution</li> </ul>	<ul style="list-style-type: none"> <li>Uses logical forms of representation (e.g., text, graphs, symbols) to justify solutions and solution strategies</li> <li>Constructs viable arguments and critiques the reasoning of others, attending to precision</li> </ul>
<b>Operations and Algebraic Thinking</b>	<ul style="list-style-type: none"> <li>Determines products and quotients of whole numbers</li> <li>Solves one-step word problems by multiplying and dividing within 100 with limited accuracy</li> <li>Determines the unknown whole number in a multiplication or division equation</li> <li>Recognizes simple arithmetic patterns</li> </ul>	<ul style="list-style-type: none"> <li>Interprets products and quotients of whole numbers</li> <li>Uses equal groups and arrays to accurately solve word problems involving multiplication and division within 100</li> <li>Solves two-step word problems with unknowns in equations involving all four operations</li> <li>Applies the properties of multiplication</li> <li>Recognizes products of two single-digit numbers</li> <li>Consistently uses estimation strategies to assess the reasonableness of answers</li> <li>Recognizes arithmetic patterns</li> </ul>	<ul style="list-style-type: none"> <li>Uses area models to solve word problems involving multiplication and division within 100</li> <li>Creates and solves equations with unknown factors to solve word problems</li> <li>Recognizes products of two single-digit numbers and the related division facts</li> <li>Explains arithmetic patterns using the properties of operations</li> </ul>

### Grade 3 RICAS Achievement Level Descriptors

Grade 3	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Number and Operations in Base Ten</b>	<ul style="list-style-type: none"> <li>• Uses place value to round two-digit numbers to the nearest 10</li> <li>• Solves problems by adding and subtracting within 1000 using various strategies with limited accuracy</li> </ul>	<ul style="list-style-type: none"> <li>• Uses place value to round three digit numbers to the nearest 10</li> <li>• Fluently adds and subtracts within 1000 using various strategies</li> <li>• Solves problems involving multiplication of a one-digit whole number by multiples of 10 in the range 10-90</li> </ul>	<ul style="list-style-type: none"> <li>• Uses place value to round three digit numbers to the nearest 100</li> <li>• Recognizes the relationship between addition and subtraction</li> <li>• Uses algorithms to add and subtract within 1000 and multiply one-digit whole numbers by multiples of 10 in the range 10-90, and explain why they work</li> </ul>
<b>Number and Operations - Fractions</b>	<ul style="list-style-type: none"> <li>• Visually identifies fractional parts of a whole</li> <li>• Recognizes equivalent fractions</li> <li>• Compares two fractions with like numerators or like denominators</li> </ul>	<ul style="list-style-type: none"> <li>• Identifies fractional parts of a whole</li> <li>• Identifies and represents fractions on number lines or other visual fraction models that are already created</li> <li>• Generates equivalent fractions</li> <li>• Represents whole numbers as fractions</li> <li>• Compares fractions with like numerators or denominators by reasoning about their size using visual fraction models that are already created, and symbols <math>&lt;</math>, <math>&gt;</math> and <math>=</math></li> </ul>	<ul style="list-style-type: none"> <li>• Explains fraction equivalence</li> <li>• Recognizes and explains fractional equivalence of whole numbers</li> <li>• Creates visual fraction models to justify the size comparison made about two fractions that refer to the same whole.</li> </ul>
<b>Measurement and Data</b>	<ul style="list-style-type: none"> <li>• Tells, writes and measures time to the nearest minute</li> <li>• Identifies appropriate tools and units of measurement to solve problems</li> <li>• Uses scaled picture graphs and bar graphs to solve problems</li> <li>• Uses line plots to solve problems</li> </ul>	<ul style="list-style-type: none"> <li>• Solves word problems involving addition and subtraction of time intervals in minutes</li> <li>• Selects and uses appropriate tools and units of measure to solve problems</li> <li>• Draws simple scaled picture graphs and bar graphs and uses them to solve one-step problems</li> </ul>	<ul style="list-style-type: none"> <li>• Uses estimation to solve word problems involving measurement</li> <li>• Draws scaled picture graphs and scaled bar graphs and uses them to solve two-step problems</li> <li>• Interprets scaled picture and bar graphs, and line plots</li> <li>• Differentiates perimeter from area</li> </ul>

### Grade 3 RICAS Achievement Level Descriptors

Grade 3	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Measurement and Data</b>	<ul style="list-style-type: none"> <li>• Finds area by using non-standard units</li> <li>• Solves mathematical problems involving perimeters of polygons, including finding the perimeter given the side length</li> </ul>	<ul style="list-style-type: none"> <li>• Generates measurement data using rulers marked with halves and fourths of an inch</li> <li>• Creates line plots with whole numbers, halves and fourths to record and show data to solve problems</li> <li>• Finds area by using standard units</li> <li>• Relates multiplication and addition to area</li> <li>• Determines area by decomposing shapes into non-overlapping rectangles and adding the areas of the non-overlapping parts</li> <li>• Solves mathematical problems involving perimeters of polygons, including finding an unknown side length and identifies rectangles with the same perimeter and different area</li> </ul>	<ul style="list-style-type: none"> <li>• Solves mathematical and real-world problems involving perimeters of polygons, including finding an unknown side length and is able to reproduce rectangles with the same perimeter and different area</li> </ul>
<b>Geometry</b>	<ul style="list-style-type: none"> <li>• Identifies two-dimensional shapes based on their sides and angles</li> <li>• Partitions shapes into parts</li> </ul>	<ul style="list-style-type: none"> <li>• Describes two-dimensional shapes based their sides and angles</li> <li>• Partitions shapes into parts with equal areas and expresses the area as a unit fraction of the whole</li> </ul>	<ul style="list-style-type: none"> <li>• Compares and classifies two-dimensional shapes based on their sides and angles</li> </ul>

### Grade 4 RICAS Achievement Level Descriptors

Grade 4	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Conceptual Understanding and Procedural Knowledge</b>	<ul style="list-style-type: none"> <li>• Demonstrates partial understanding of the grade appropriate numeration system</li> <li>• Performs some calculations and estimations</li> <li>• Identifies examples of basic math facts or mathematical concepts</li> <li>• Mostly reads and sometimes constructs graphs, tables and charts</li> </ul>	<ul style="list-style-type: none"> <li>• Applies understanding of the base-ten system and fractions to interpret numbers and solve problems</li> <li>• Performs most calculations and estimations</li> <li>• Describes mathematical concepts and generates examples and counterexamples of concepts</li> <li>• Represents data and mathematical relationships using equations, verbal descriptions, tables, and graphs</li> </ul>	<ul style="list-style-type: none"> <li>• Performs complex calculations and estimations</li> <li>• Selects the best representations for a given set of data</li> <li>• Explains relationships between models such as equations, verbal descriptions, tables, and graphs</li> <li>• Applies math facts and connects mathematical concepts from various areas of mathematics, and uses the concepts to develop generalizations</li> <li>• Recognizes and makes use of structure, discerning patterns by seeing complicated things as single objects</li> </ul>
<b>Problem Solving</b>	<ul style="list-style-type: none"> <li>• Applies learned procedures to solve routine problems</li> <li>• Uses concrete objects or pictures to help conceptualize and solve problems.</li> </ul>	<ul style="list-style-type: none"> <li>• Applies learned procedures and mathematical concepts to solve a variety of problems, including multi-step problems</li> <li>• Solves problems using multiple methods</li> <li>• Demonstrates the relationships between operations used to solve problems and the context of the problems</li> </ul>	<ul style="list-style-type: none"> <li>• Generates strategies and procedures to solve non-routine problems</li> <li>• Solves problems using multiple methods, evaluating reasonableness of intermediate steps leading to the standard algorithms</li> <li>• Draws connections between strategies</li> <li>• Analyzes givens, constraints, and relationships in problems, using multiple methods and appropriate tools</li> </ul>

## Grade 4 RICAS Achievement Level Descriptors

Grade 4	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Mathematical Reasoning</b>	<ul style="list-style-type: none"> <li>Applies some reasoning methods to solve routine problems</li> </ul>	<ul style="list-style-type: none"> <li>Uses a variety of reasoning methods to solve routine and non-routine problems</li> <li>Uses symbols to solve routine mathematical problems</li> </ul>	<ul style="list-style-type: none"> <li>Reasons abstractly and quantitatively, using multiple reasoning methods to solve complex problems and provides justification for the reasoning</li> <li>Decontextualizes situations and represents them symbolically</li> </ul>
<b>Mathematical Communication</b>	<ul style="list-style-type: none"> <li>Identifies and uses basic terms</li> </ul>	<ul style="list-style-type: none"> <li>Uses logical forms of representation (e.g., text, graphs, symbols) to illustrate steps to a solution</li> <li></li> </ul>	<ul style="list-style-type: none"> <li>Uses logical forms of representation (e.g., text, graphs, symbols) to justify solutions and solution strategies</li> <li>Constructs viable arguments and critiques the reasoning of others, attending to precision</li> </ul>
<b>Operations and Algebraic Thinking</b>	<ul style="list-style-type: none"> <li>Interprets a multiplication equation as a comparison</li> <li>Solves multiplication and division word problems</li> <li>Solves two-step word problems using the four operations with whole numbers, including problems where remainders must be interpreted</li> <li>Identifies multiplication facts through <math>12 \times 12</math></li> <li>Identifies factor pairs in the 1-100 range</li> <li>Identifies a pattern that follows a rule</li> </ul>	<ul style="list-style-type: none"> <li>Recognizes verbal statements of multiplicative comparisons as multiplication equations.</li> <li>Represents multiplication and division word problems using drawings and equations</li> <li>Uses the four operations to solve multi-step word problems and represents the problems by equations</li> <li>Identifies related multiplication and division facts through <math>12 \times 12</math></li> <li>Finds factor pairs in the 1-100 range and recognizes that a whole number is a multiple of each of its factors</li> <li>Distinguishes between prime and composite numbers in the range 1-100</li> <li>Identifies a pattern that follows a rule and, generates a pattern, given a rule</li> </ul>	<ul style="list-style-type: none"> <li>Explains the difference between multiplicative and additive comparison</li> <li>Uses equations to represent problems, and justifies solutions with estimation</li> <li>Identifies multiples and their corresponding factors, and distinguishes between prime and composite numbers.</li> <li>Generates patterns not explicit to the rule</li> </ul>

### Grade 4 RICAS Achievement Level Descriptors

Grade 4	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Number and Operations in Base Ten</b>	<ul style="list-style-type: none"> <li>Reads and writes whole numbers using base-ten number names and expanded form</li> <li>Uses place value understanding to round whole numbers to the thousands place</li> <li>Solves problems involving multiplication of four-digit numbers by one-digit numbers</li> <li>Solves problems involving quotients and remainders with up to three-digit dividends and one-digit divisors based on place value and properties of operations</li> </ul>	<ul style="list-style-type: none"> <li>Uses place value to recognize that in a multi-digit number, a digit in any place represents 10 times as much as it represents in the place to its right</li> <li>Compares two multi-digit numbers based on place value position using <math>&lt;</math>, <math>&gt;</math> and <math>=</math></li> <li>Uses place value understanding to round whole numbers to the ten thousands place</li> <li>Adds and subtracts whole numbers using the standard algorithm</li> <li>Solves problems involving multiplication of two-digit numbers by two-digit numbers</li> <li>Solves problems involving quotients and remainders with up to four-digit dividends and one-digit divisors, using the relationship between multiplication and division</li> </ul>	<ul style="list-style-type: none"> <li>Uses place value understanding to round whole numbers up to one million</li> <li>Uses understanding of structure to explain the standard algorithm for addition and subtraction.</li> <li>Solves problems involving multiplication of four-digit numbers by one-digit numbers, and justifies solutions by using equations, rectangular arrays or area models.</li> </ul>
<b>Number and Operations – Fractions</b>	<ul style="list-style-type: none"> <li>Recognizes equivalency in fractions</li> <li>Compares fractions with different numerators and different denominators by using common denominators or common numerators</li> </ul>	<ul style="list-style-type: none"> <li>Explains why fractions are equivalent using visual fraction models</li> <li>Consistently compares two fractions when the two fractions refer to the same whole</li> <li>Compares fractions with different numerators and different</li> </ul>	<ul style="list-style-type: none"> <li>Generates equivalent fractions including fractions greater than 1</li> <li>Decomposes fractions into a sum of fractions and justifies solutions to problems with visual fraction models and equations</li> <li>Justifies the conversion of a fraction with denominator of 10 to an</li> </ul>

<b>Number and Operations - Fractions</b>	<ul style="list-style-type: none"> <li>Decomposes fractions into a sum of fractions and uses visual fraction models to solve problems</li> <li>Multiplies a fraction by a whole number</li> </ul>	<p>denominators by comparing to a benchmark fraction</p> <ul style="list-style-type: none"> <li>Adds and subtracts fractions with like denominators</li> <li>Decomposes fractions into a sum of fractions and uses equations to solve problems</li> <li>Adds and subtracts mixed numbers with like denominators by replacing with equivalent fraction and by using properties of operations or the relationship of addition and subtraction</li> <li>Uses visual fraction models and equations to solve word problems involving multiplication of a fraction by a whole number</li> <li>Uses decimal notation to represent fractions with denominators of 10 or 100</li> <li>Consistently compares two decimals to hundredths when the two decimals refer to the same whole using <math>&lt;</math>, <math>&gt;</math> and <math>=</math></li> </ul>	<p>equivalent fraction with a denominator of 100 and expresses it as a decimal</p> <ul style="list-style-type: none"> <li>Justifies the comparisons of two decimals to hundredths by using a visual model</li> </ul>

### Grade 8 RICAS Achievement Level Descriptors

Grade 8	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Expressions and Equations</b>	<ul style="list-style-type: none"> <li>Solves one-variable linear equations with one or many solutions</li> <li>Recognizes that the point of intersection of two linear equations is the solution</li> </ul>	<ul style="list-style-type: none"> <li>Performs operations with decimals and scientific notation</li> <li>Uses scientific notation and chooses appropriate units of measurement for varying magnitudes</li> <li>Uses linear equations and systems of linear equations to represent and solve problems.</li> <li>Compares proportional relationships represented in different ways</li> <li>Recognizes the difference between proportional and non-proportional in linear relationships</li> <li>Solves one-variable linear equations with rational coefficients</li> <li>Solves systems of two linear equations algebraically or graphically in real-world and mathematical problems</li> </ul>	<ul style="list-style-type: none"> <li>Derives the equation <math>y=mx</math> for a line through the origin and the equation <math>y=mx + b</math> for a line intercepting the vertical axis at <math>b</math></li> <li>Uses linear equations and systems of linear equations to represent, analyze, and solve problems.</li> <li>Estimates solutions to systems of two equations from a graph</li> </ul>
<b>Functions</b>	<ul style="list-style-type: none"> <li>Identifies a relationship as a function</li> <li>Interprets the equation of a linear function</li> </ul>	<ul style="list-style-type: none"> <li>Compares the properties of functions represented in different ways</li> <li>Writes a function to model a linear relationship</li> <li>Determines the rate of change and initial value of a function from a description including reading these from a table or graph</li> <li>Describes or sketches functional relationships represented graphically</li> </ul>	<ul style="list-style-type: none"> <li>Identifies functions as linear and non-linear from graphs or equations</li> <li>Interprets the rate of change of a function from a table, graph, equation or description</li> </ul>

### Grade 8 RICAS Achievement Level Descriptors

Grade 8	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Geometry</b>	<ul style="list-style-type: none"> <li>• Identifies the properties of rotations, reflections, and translations</li> <li>• Translates and reflects two dimensional figures</li> <li>• Uses the relationship among the sides of a right triangle to solve problems</li> <li>• Uses the Pythagorean theorem to find the hypotenuse of a right triangle</li> </ul>	<ul style="list-style-type: none"> <li>• Describes the congruence relationship between two congruent figures</li> <li>• Describes the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates</li> <li>• Describes the similarity relationship between two similar figures</li> <li>• Rotates two-dimensional figures around the origin</li> <li>• Finds angle sum and exterior angle of triangles, angles created when parallel lines are cut by a transversal, and angle-angle criterion for similarity of triangles</li> <li>• Applies the Pythagorean theorem to find distances between points on the coordinate plane</li> <li>• Applies the Pythagorean theorem to determine the unknown side lengths in right triangles in mathematical and real-world problems</li> <li>• Solves mathematical and real-world problems involving volume of cones, cylinders, and spheres</li> </ul>	<ul style="list-style-type: none"> <li>• Use informal arguments to establish facts about the angle sum and exterior angle of triangles, angles created when parallel lines are cut by a transversal, and angle-angle criterion for similarity of triangles</li> <li>• Justifies the Pythagorean theorem and its converse</li> <li>• Given the volume of a cone, finds unknown dimensions of the cone</li> <li>• Given the volume of a cylinder, finds unknown dimensions of the cylinder</li> <li>• Given the volume of a sphere, finds unknown dimensions of the sphere</li> </ul>

### Grade 8 RICAS Achievement Level Descriptors

Grade 8	Partially Meets Expectations <i>On RICAS, a student at this level:</i>	Meeting Expectations <i>On RICAS, a student at this level:</i>	Exceeding Expectations <i>On RICAS, a student at this level:</i>
<b>Statistics and Probability</b>	<ul style="list-style-type: none"> <li>• Identifies and constructs a line of best fit</li> <li>• Describes the patterns associated with bivariate categorical data</li> <li>• Finds relative frequency in a two-way table</li> </ul>	<ul style="list-style-type: none"> <li>• Constructs and interprets scatter plots</li> <li>• Uses the equation of a linear model to solve problems</li> <li>• Constructs and interprets two-way tables</li> </ul>	<ul style="list-style-type: none"> <li>• Analyzes scatter plots</li> <li>• Interprets the slope and intercept of linear models</li> <li>• Analyzes relative frequencies in two-way tables</li> </ul>
