

# Understanding the RICAS Assessment

*Updated: October 2019*

# What is the RICAS?

- RICAS is the Rhode Island version of the Massachusetts MCAS for grades 3-8 in **English language arts (ELA) and math assessment**
  - Focuses on students' **critical thinking abilities, application of knowledge**, and ability to make **connections between reading and writing**
  - Gives a **signal of student readiness** for the next grade level
  - Took place in **Spring 2018 and Spring 2019**
- What is the test like?
  - Students take **two sessions each** of ELA and math
  - Designed to be given on a **computer**, paper available for students with accommodations
  - **Item types** include multiple choice, fill-in-the-blank, “technology enhanced” questions like drag-and-drop, and written responses/essays

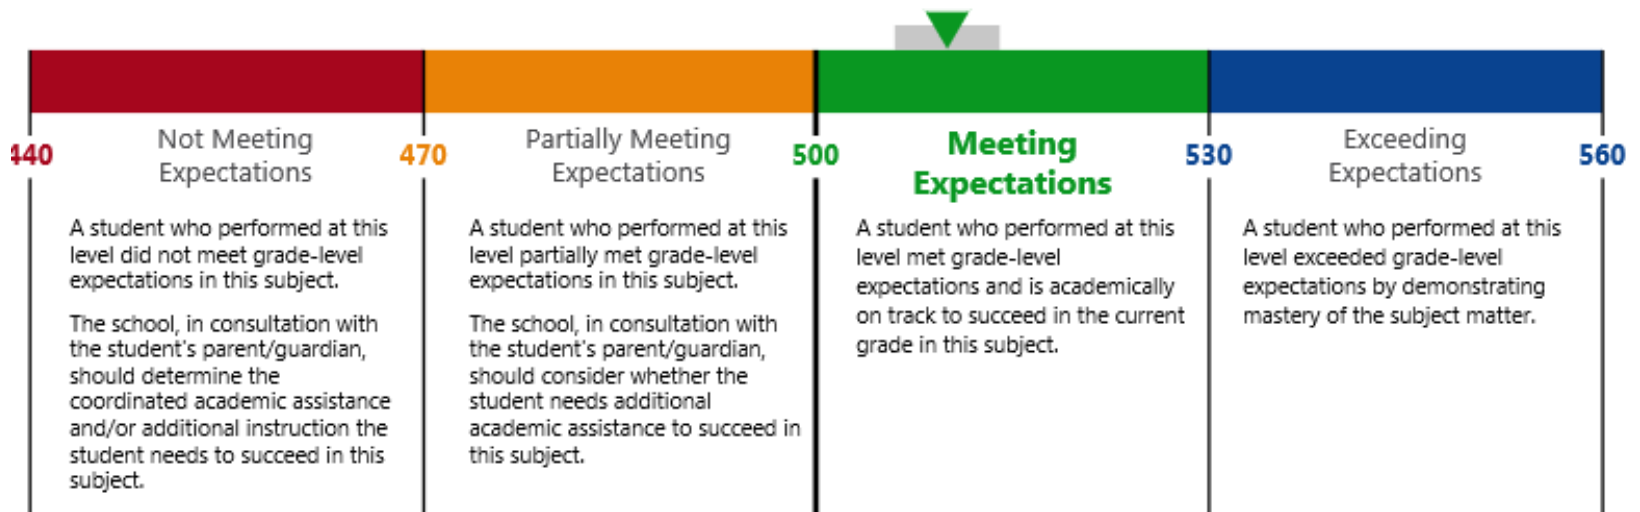

# Score Release

- RICAS scores released in October 2019 to districts, schools, and families
- Grade 3-8 students receive scores for English language arts and mathematics
- Grade 4-8 students also receive a growth score for English language arts and mathematics
- Families will receive a paper student report from their school

# What do the scores look like?

- Student's score
  - A student receives a scale score between 440 and 560
  - RICAS uses four performance levels that describe how well student(s) meet the expectations for their grade level: **Not Meeting Expectations**, **Partially Meeting Expectations**, **Meeting Expectations**, and **Exceeding Expectations**
  - Meeting Expectations means that students are able to demonstrate grade level expectations while Exceeding Expectations means that students are showing mastery of the grade level expectations
  - A triangle marks where the student's score falls on the chart, with a gray bar showing the range of scores a student could receive if they took the test multiple times (see *example* below)

# What do the scores look like?

- Achievement comparison (see *example* below)
  - If the student took RICAS last year, that score is listed
  - Average scores show how the student, their school, and their district compare with the state average
  - Scores are color coded to match the achievement level for quick reference

## Achievement

How your child performed compared to students in their school, district, and state.

Your Child's		Year	Average Score		
Grade	Score		School	District	State
4	509	2019	502	498	493
3	513	2018			

# What do the scores look like?

- Student growth percentiles (SGP) compared to average growth at the school, district, and state

*On a scale of 1 (low growth) to 99 (high growth), the SGP describes your child's learning over time compared with their academic peers (other Rhode Island students in the same grade who had similar scores on previous state level tests).*

# Why are these scores important?

- **RICAS gives teachers, students, and families information** about student progress, school performance, and how to improve teaching and learning
- The performance standards for RICAS **signal students' readiness** for the next grade level.
- **Look closely at where your child's score falls** within the Partially Meeting Expectations category. If it isn't close to Meeting Expectations, talk with your child's teacher that content area (ELA or math) about how you can work together to help your child catch up.
- A **student growth percentile (SGP)** allows us to measure the progress your child is making in school in some key subject areas. Along with other indicators such as test scores and course grades, SGPs provide information about your child's performance – where your child is now as well as the progress your child is making over time.

# Where can I find more information?

- [www.ride.ri.gov/Families](http://www.ride.ri.gov/Families) for FAQs about:
  - content standards and curriculum
