| 2:30 pm| Closure for the Day                     |                                                                           |
Welcome from Commissioner

- Ken Wagner, Ph.D.,
  - Rhode Island Commissioner of Education
State & Community Partnership

• Neil Steinberg,
  • President & CEO, The Rhode Island Foundation

• Lisa DiMartino, Ph.D.
  • Strategic Initiative Officer, The Rhode Island Foundation
Norms

- Avoid assumptions about positions of authority, educational background or district representation.
- Comment on ideas, not individuals.
- Be present, listen actively and respectfully, without interrupting.
- Honor equity of voice; help make sure all perspectives are able to be heard.
- Trust the process.
- Be solutions-oriented.
Rhode Island Framework for Comprehensive School Improvement

• Complex work needs guardrails

• State articulates coherent strategy

• Evidence-based essential elements

• Innovation, flexibility, continuous improvement
A Systems Framework for Improvement

- Equity
- Shared Responsibility
- Turnaround Leadership
- Climate & Culture Shift
- High Quality Materials & Instructional Transformation
- Talent Development & Collaboration
- Everyone has a role to play
A Framework Rooted in the Field

• Developing a Framework: Massachusetts
  • Worked with national organizations to develop
  • Evaluate, build understanding, course correct
  • Evolving process took over five years

• Piloting an Approach: Central Falls
  • LEA identified a local challenge
  • RIDE provided technical assistance + convening power
  • SEA and LEA worked collaboratively to problem solve
Teaching & Learning
Reflection

What comes to mind when you hear Teaching & Learning?
Division of Teaching & Learning

Student, Community & Academic Support
(David Sienko)

Educator Effectiveness & Certification Services
(Vacant/Lisa Foehr)

Instruction, Assessment & Curriculum
(Phyllis Lynch)
Isaac, 11th Grade

• “I’m willing to take any chance in my life for this dream.” Listen for a moment to Isaac’s story.

• ... “Despite his early struggles, Isaac invested deeply in school. He did everything he was supposed to do to reach his goal.”

(The Opportunity Myth, 2018, TNTP)
“But has school held up its end of the deal?”

• More students than ever enrolling in college but far fewer succeed. 40% take at least one remedial course.

• Graduates who opt for work straight out of school are in a similar situation- employers report missing skills to do the work.

• Students believe what we’ve been telling them- if they show up, do the work and meet teachers’ expectations, they will be prepared.

It’s a Myth- It’s not enough

But make no mistake, this is not about teachers or administrators or any 1 person we might try to blame. No 1 person or group is responsible, at every level of the system we make decisions that perpetuate inequity and mediocrity.
TNTP wanted to learn more and here’s what they found...

• Students have big, clear plans

• Most do what they are asked in school but are not ready to succeed after school

• Students spend most of their time without access to four key resources: grade-appropriate assignments, strong instruction, deep engagement, and teachers who hold high expectations

• Students of color and those from low-income families, English learners, and students with mild-moderate disabilities have even less access to these resources than their peers

• Greater access to the four resources can, and does, improve student achievement
Guess What? This is the same information Marzano and others reported years ago...

• Guaranteed and viable curriculum is the top school-level factor
• Challenging Goals and Feedback on Work is #2

• Instructional Strategies is the top teacher-level factor
• Classroom Management in #2

• The decisions teachers make have the greatest impact on students. Teachers have the greatest impact on our students.
• School Leaders #2

*Please Note: The other factors all matter too! These had the greatest statistical impact.*
This is Teaching & Learning

It’s all the areas of the previous slides. It’s teaching, leading, classroom culture, instruction, curriculum, student work, grade-level assignments, student engagement- it’s supporting students to learn and be successful citizens.

It’s **Never** Teaching & Learning OR.....

It’s **Always** Teaching & Learning AND...
What is Curriculum in Rhode Island?

Curriculum is a standards-based sequence of planned experiences where students practice and achieve proficiency in content and applied learning skills. Curriculum is the central guide for all educators as to what is essential for teaching and learning, so that every student has access to rigorous academic experiences. The structure, organization, and considerations in a curriculum are created in order to enhance student learning and facilitate instruction. Curriculum must include the necessary goals, methods, materials and assessments to effectively support instruction and learning.

- Goals within a curriculum are the standards-based benchmarks or expectations for teaching and learning. Most often, goals are made explicit in the form of a scope and sequence of skills to be addressed. Goals must include the breadth and depth to which a student is expected to learn.

- Methods are the instructional decisions, approaches, procedures, and routines that teachers use to engage all students in meaningful learning. These choices support the facilitation of learning experiences in order to promote a student’s ability to understand and apply content and skills. Methods are differentiated to meet student needs and interests, task demands, and learning environment. Methods are adjusted based on ongoing review of student progress towards meeting the goals.

- Materials are the tools selected to implement methods and achieve the goals of the curriculum. Materials are intentionally chosen to support a student’s learning. Material choices reflect student interest, cultural diversity, world perspectives, and address all types of diverse learners.

- Assessment in a curriculum is the ongoing process of gathering information about a student’s learning. This includes a variety of ways to document what the student knows, understands, and can do with their knowledge and skills. Information from assessment is used to make decisions about instructional approaches, teaching materials, and academic supports needed to enhance opportunities for the student and to guide future instruction.
Our Beliefs...

All students deserve the opportunity to learn from engaging, grade-level, high quality curriculum to prepare for success in college, career and civic life.

• High quality curriculum is the foundation of an equitable academic program that includes goals, instructional practices, assessments, differentiation and intervention plans.

• High quality curriculum implemented with integrity across a system is a lever for increased student accessibility and growth.

• High quality curriculum adoption will only be successful with curriculum specific, job-embedded, high quality professional learning.

• High quality curriculum must be the focus of an aligned system that begins with teacher preparation through in-service experiences.
Why Do Curriculum AND Professional Learning Matter?

Effect Sizes of HQ Instructional Materials

<table>
<thead>
<tr>
<th>HQ Materials Only</th>
<th>HQ Materials with PL</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.06</td>
<td>0.09</td>
</tr>
</tbody>
</table>

What Do We Do?

• Ask students and families directly about their goals and school experiences; listen to what they share; act on it (part of needs assessment and root cause)

• Make greater access to grade-appropriate assignments an urgent priority for all. (Support educators with time for PL with each other)

• Give all students, especially those who are behind, access to instruction that asks them to engage deeply with challenging material

• Ensure educators enact high expectations for student success by seeing firsthand that students can do it

• Consider an equity audit to identify school and district decisions that give students greater access than others

The gaps do shrink...
Invest in Professional Learning
Is Any Professional Learning Good?

• Catalyst Sessions vs. Professional Learning

• 1 Day- 5 hours to learn Common Core Standards vs. Instructional Coaching, Student Work Reviews, Learning Walks, Peer to Peer feedback, Co-design of Lessons, Lesson Study
Strategies Underway

13 LEAs Supported by Ed Reports Curriculum Project

Professional Learning Plan Implementation Support

District Network Meetings on Professional Learning

Professional Learning Priority/ECN

Ed Prep Program Conversations

Supported by a grant from Council for Chief State School Offices (CCSSO)
Save the Date

District Network Meeting #2
January 25\textsuperscript{th}, 2018

- Inquiry-driven approach to professional learning.
- A process for internalizing lessons to increase efficacy of high quality curriculum materials.
- Considering exemplary responses from students in a particular lesson and comparing that to current levels of achievement.
- Understanding the Leading Educators Content Cycles and how you might apply to your local context.
Where is Isaac?

• He struggled in 9th and 10th grade. He had a series of experiences where adults told him implicitly and explicitly that he wouldn’t make it.

• He got back on track. He didn’t want his parents to be sad. He knew he needed a diploma.

• He is enrolled in a nursing program at a vocational college. He started courses before graduation.

• Students do have barriers to overcome but many of the barriers are created by decisions made by adults, within our control.
## Comprehensive School Improvement Planning

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Establish Community Advisory Boards → Conduct Needs Assessment and Root Cause Analysis → Select Interventions &amp; Create school Improvement Plan → Apply for School Improvement Funding</td>
</tr>
</tbody>
</table>

**RIDE**

**LEA**

**Collaborative Team**  
*(School & Community Advisory Board)*
Community Advisory Boards

• The Rhode Island State Plan creates CABs in order to:

• provide a dedicated seat at the table to members of the communities directly served by CSI schools and;

• empower these community members with real decision-making and oversight authority at every stage of the school improvement process;

• serve the interest of **Equity** and **Shared Responsibility** and will bring a new voice to school improvement in Rhode Island
Assembling the CABs

• RIDE will provide
  • Policy guidance
  • Technical assistance
  • Launch funding
  • Support development and networking activities for CABs

• LEAs will
  • Recruit and select broad, representative members from the community
  • Adopt policies, protocols and schedules for CABs
  • Support orientation and development of CABs in their school community
  • Finalize CAB(s) by **March 4th** and submit names and biographies to RIDE
Timeline of CAB Activities

1. Orientation of Newly Assembled CABs
2. Needs Assessment and Root Cause Analysis
3. Selection of Evidence Based Interventions and Development of School Improvement Plans
4. Application for School Improvement Funding

Beyond the scope of Today

5. School Improvement Monitoring and Support
6. Annual Reporting of Progress
CAB Questions?
CAB Workshop Activity

• Please make your way to round tables with your LEA name

• Follow the directions on the packet on the table to help you plan for assembling, developing and supporting your CABs
Comprehensive Needs Assessment & Root Cause Analysis

- Drew Milligan,
  - Transformation Specialist
## Comprehensive School Improvement Planning

<table>
<thead>
<tr>
<th></th>

</tbody>
</table>
Conducting a Comprehensive Needs Assessment

1. Select a comprehensive needs assessment (LEA)
2. Identify and gather data (LEA)
3. Present data to the collaborative team (LEA presents to school and CAB)
4. Prioritize indicators for root cause analysis (school and CAB)
Step 1. Selecting a Comprehensive Needs Assessment

*Four key questions:*

1. Is it comprehensive?

2. Is it aligned?
Step 1. Selecting a Comprehensive Needs Assessment

*Four key questions:*

3. Are indicators valid and measurable?

4. Does it allow for prioritization?
Sample Comprehensive Needs Assessments

• Rhode Island Model Comprehensive Needs Assessment provided in the appendix of your Practitioners’ Guide

• Georgia Department of Education Comprehensive Needs Assessment

• Moving Your Numbers District Self Assessment Guide

• Global Best Practices 2nd Edition (Secondary schools only)
Conducting a Comprehensive Needs Assessment

1. Select a comprehensive needs assessment (LEA)
2. Identify and gather data (LEA)
3. Present data to the collaborative team (LEA presents to school and CAB)
4. Prioritize indicators for root cause analysis (school and CAB)
Step 2. LEA Gathers Data

For every indicator, data should be:

- Triangulated
- Contextualized
- Visualized/Summarized
Conducting a Comprehensive Needs Assessment

1. Select a comprehensive needs assessment (LEA)
2. Identify and gather data (LEA)
3. Present data to the collaborative team (LEA presents to school and CAB)
4. Prioritize indicators for root cause analysis (school and CAB)
Step 3. LEA Presents Data to Collaborative Team

- LEA builds collaborative team’s capacity to understand and analyze data

- Collaborative team asks questions:
  - Additional data?
  - Clarifying questions?
  - Avoids making judgements, proposing solutions
Conducting a Comprehensive Needs Assessment

1. Select a comprehensive needs assessment (LEA)
2. Identify and gather data (LEA)
3. Present data to the collaborative team (LEA presents to school and CAB)
4. Prioritize indicators for root cause analysis (school and CAB)
Step 4. Collaborative Team Prioritizes Indicators

- Individual or groups of indicators are analyzed and evaluated on two axes:

- Each collaborative team should end with 3-5 **High Priority, Weak Performance** indicators
Conducting a Root Cause Analysis (RCA)

• RCA helps us with:

  • Focusing
  • Solving the right problem
  • Identifying factors within our control
Conducting a Root Cause Analysis

• Improving upon the “5 Whys” Traditional Protocol
Selecting Root Causes

- Most powerful root causes are those that:
  - Are within your control to address
  - Supported by the data
  - Specific and robust

Protocol for identifying key root causes provided in your Practitioner's Guide

|   • Apply for School Improvement Funding |   | |

**Establish Community Advisory Boards**

**Conduct Needs Assessment and Root Cause Analysis**

**Select Interventions & Create school Improvement Plan**

**Apply for School Improvement Funding**
Selecting a Strategy

• Strategies for School Improvement must be:
  • Identified by consensus of collaborative team
  • Aligned to the Rhode Island Framework for Comprehensive School Improvement
  • Aligned to identified needs and root causes
  • Evidence-based
Why Evidence Matters

• Required by law

• Increasingly prevalent in education

• Hard work, but the right work
Think/Pair/Share

“Evidence Based Practice” was first applied as a professional standard in medicine.

T/P/S

• Why is using evidence be so important to the practice of medicine?
• What similarities does this have to education of children?
Evidence Defined
Tier 1 - Strong Evidence (Experimental Study)

- Randomized control experiment (i.e., has treatment and control group, uses random assignment)
- Large sample - at least 350 students or other units
- More than one site (school, district, or state)
- Produces a statistically significant, positive outcome
- Relevant to your context (i.e., similar student population/setting)

Tier 2 - Moderate Evidence (Quasi-Experimental Study)

- Quasi-experimental design (i.e., has treatment and control group, NOT assigned randomly)
- Large sample - at least 350 students or other units
- More than one site (school, district, or state)
- Produces a statistically significant, positive outcome
- Relevant to your context (i.e., similar student population/setting)

Tier 3 - Promising Evidence (Correlational Study)

- Correlational study (i.e., examines relationship between treatment and outcome, does not establish causation)
- Uses statistical control for selection bias
- Produces a statistically significant, positive outcome

Tier 4 - Demonstrates a Rationale (Logic Model + Research + Effort to Study)

- Logic model (i.e., identifies key components of proposed intervention, describes relationship between components and relevant outcomes)
- Relevant research or intervention suggest improving relevant outcomes is likely
  Includes an effort to study the impact of the intervention (or points to one happening elsewhere)
- Consider including fidelity of implementation
Where to Find Evidence-Based Strategies

• What Works Clearing House (endorses Tiers I & II)
• Evidence For ESSA
• Results First Clearing House
• Best Evidence Encyclopedia
• RAND report on school leadership
• RI School Improvement Resource Hub
• Other state resource hubs (use with caution)
• For interventions/research not included above, Google Scholar is an excellent starting point
From Strategy Selection to Comprehensive School Improvement Plan

To build a Comprehensive School Improvement Plan, you must record for each evidence-based strategy:

1. Strategy justification: description, alignment, and rationale
2. Evidence basis: at least one Tier I-III research citation
3. Funding strategy *(to be addressed next)*
4. Milestones and goals
5. Monitoring plan

*Comprehensive School Improvement templates forthcoming, by February.*

1003 Funding Under ESSA: Major Changes

- No more 1003(a)
- Duration of project period
- Community Advisory Board (CAB)
- Comprehensive application
- Expectation of evidence
- Embedded School Improvement Plan
School Improvement Launch Mini-Grants

• One time grants

• Every school identified for CSI status eligible
  • LEA may bundle for purchasing power

• Full detailed information forthcoming via email

• Necessary application items:
  • One paragraph (no more than 500 words) outlining plan
  • Identified project manager responsible + superintendent signature
  • Accurate budget with associated spending plan
**School Improvement Support Grants**

- $1,305,834 available, in total

- Formula allocation based on $103/per student

- Primary source of school improvement funding to be offered to schools by RIDE

- 2-4 year projects

- Must meet evidence criteria to receive funds
Competitive 1003 Funds Under ESSA

$2,210,879.80 in competitive funds available to fund evidence-based strategies

Average total allocation per school in competitive funds: $10,000-$100,000
### Core Information for Competitive Grants: Innovation & Dissemination

<table>
<thead>
<tr>
<th>Innovation</th>
<th>Expectations of Both</th>
<th>Dissemination</th>
</tr>
</thead>
<tbody>
<tr>
<td>LEA/School must provide local definition of Innovation and describe how proposed strategy is aligned</td>
<td>Must be focused on a Specific Evidenced Based Strategy</td>
<td>Requires partnership between an identified school and non-identified school</td>
</tr>
<tr>
<td>State <strong>Priority</strong> of: <em>Projects that address the use of high quality curricular materials and aligned professional development</em></td>
<td>Strategy selection must be based in needs assessment and root cause analysis</td>
<td>Lead applicant must be LEA with identified school</td>
</tr>
<tr>
<td></td>
<td>Project Plans are for 1-2 years</td>
<td>Partnership can be across multiple LEAs or within a single LEA</td>
</tr>
<tr>
<td></td>
<td>CSI Schools and Schools with ATSI/TSI Subgroups are all eligible</td>
<td>Lead applicant must serve as fiscal manager and provide fiscal oversight for subawards to partnering LEAs/schools</td>
</tr>
</tbody>
</table>
Core Information for Competitive Grants: Redesign Planning and Implementation

- Different than other funding streams
- Two paths to “trigger” this funding
  - By timeline in Rhode Island ESSA State Plan
  - By the school or LEA itself
- Do not need grant to enter Redesign
- Entering Redesign does not guarantee grant
- One mechanism to support Redesign

Please note:
Planning grant is only available to newly identified schools
Comprehensive Funding Application

• Review Independently

• Turn and Talk:
  • What are the core application components?
    • Start on page 120 of the Practitioner’s Guide to view the comprehensive application template
Funding & Implementation Timeline

<table>
<thead>
<tr>
<th>Identification Type</th>
<th>What happens if school is re-identified next year?</th>
<th>When is redesign triggered?</th>
<th>What happens if school exits identification next year?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Newly Identified CSI</td>
<td>School may request additional funding for up to 3 years to supplement its original support grant.</td>
<td>4 years *Apply for Redesign in Spring of 2022</td>
<td>Multi-Year Plan Submitted</td>
</tr>
</tbody>
</table>
| Re-Identified CSI   | Schools may request additional funding for up to 1 year to supplement its original support grant. At this time, school should consider how a support grant could assist with redesign planning. | 2 years * Apply for Redesign in spring of 2020 | Single Year Plan Submitted

If a school that exits CSI status had previously received a multi-year award, they may retain their funds through the full grant period, regardless of identification status.

If a school that exits CSI status had previously received a single year award, they will no longer be able to apply for additional years of support funding.

Applications Due to RIDE on 5/15/19
Support decisions will be made first; competitive decisions will follow by late summer, 2019
