## Executive Summary

This report provides information about Rhode Island's 2017 administration of the PARCC (Partnership for Assessment of Readiness for College and Careers) state assessment along with comparisons to our 2015 and 2016 PARCC administrations when appropriate and PSAT/NMSQT and SAT School Day. This year marks the third and final administration of the PARCC assessment, which measures student progress on challenging learning standards designed to prepare students for their future opportunities in the next grade, post-secondary education, or their careers. The 2016-2017 school year was the first statewide administration of PSAT/NMSQT and SAT School Day. Governor Gina M. Raimondo included funds in the state budget to make the PSAT and SAT free for every public high school sophomore and junior. This ensures that all students can use the SAT to consider higher education opportunities.

The PARCC assessments summarize student performance through one of five performance levels. They include: Exceeded Expectations, Met Expectations, Approached Expectations, Partially Met Expectations, or Did Not Yet Meet Expectations. The knowledge and skills students need to demonstrate at each of the performance levels were based on the recommendations of educator panels representing each of the participating states in the Consortium. Rhode Island teachers were strong participants on these panels. All states in the Consortium have adopted these same performance standards.

> A Rhode Island graduate is one who is well-prepared for postsecondary education, work, and life. He or she can think critically and collaboratively and can act as a creative, self-motivated, culturally competent learner and citizen.

## $\underline{2020}$ Vision for Education: <br> Rhode Island's Strategic Plan

The PSAT/NMSQT and SAT are highly relevant to student future success because they focus on the skills and knowledge at the heart of education. Increasing participation in the SAT is the first step to having more students be college and career ready. The SAT sets an appropriately high standard for Rhode Island students and will be a good tool to help the state close the gap between expected future job requirements for post-secondary education and current college enrollment and completion. Providing these tests for free is also about equity by increasing access to college for all students.

This year's results offer Rhode Island information on our students' progress on state standards and challenging learning expectations. This new information provides valuable insight into the benchmarks set last year and will help us monitor our continuing progress toward meeting our shared commitment to provide all students with an opportunity to leave our schools ready to pursue their goals and dreams. To be clear, academic readiness in these areas does not provide a complete picture about our students. School communities must develop students' academic knowledge and skills in reading and mathematics but also in the arts and sciences. In addition, a comprehensive program develops students' abilities to persist through challenging assignments, work collaboratively, innovate, and problem solve. This is the work our school communities actively engage in every day to help Rhode Island students grow. Assessments serve only one purpose - to give us the information necessary to continuously improve teaching, and this year's results remind us that there is still much work ahead of us. As we stated last year, these results are not an evaluation of the collective efforts of teachers and leaders, nor do they signal everything that our students are
capable of accomplishing academically. Today we offer a check on Rhode Island's efforts to ensure that all students have the opportunity to learn. We are proud of the foundational work that has been accomplished and invite you to stay committed to our ongoing progress.

## Overall Achievement

Results of the spring 2017 PARCC assessments revealed that, overall, Rhode Island students' scores remained unchanged from the previous year while participation rates continued to increase. With a change in testing requirements at the high school level, year-to-year comparisons are not always available. In ELA, grade 10 was not required in 2016-17. In Mathematics, the requirements changed from all students needing to take the Algebra I and Geometry assessments in 2015-16 to students only required to test once in high school in 2016-17.

## State-Level Results

At the state level, approximately $39 \%$ of students across grades 3 through 9 met or exceeded expectations on PARCC English Language Arts/Literacy assessment. Student proficiency rates in grades 3-8 remained consistent with 2016 levels with $40 \%$ meeting or exceeding expectations. Grade 9 ELA/Literacy performance increased by $1 \%$ compared with 2016 performance. Mathematics proficiency for grade 3-8 students compared to 2016, has $33 \%$ of students meeting or exceeding expectations. Algebra I performance decreased by 1 percentage point compared with 2016. $28 \%$ of students met or exceeded expectations in 2016 while $27 \%$ met or exceeded expectations in 2017.

As a result of statewide conversations in all communities and increased engagement with families, the statewide participation rates in both PARCC subjects reached $98 \%$ (up from $96 \%$ in 2015-16). The participation rate is above the U.S. Department of Education requirement of $95 \%$ or better participation in state assessments.

Of the $75 \%$ of Rhode Island public school students who participated in the free PSAT/NMSQT, 31\% are on track to meet the "College and Career Ready" benchmark in both Evidence-Based Reading and Writing (EBRW) and Mathematics. 56\% of students who participated are considered on track to meet the college and career readiness benchmark for EBRW and 34\% for Mathematics. In April 2017, 79\% of Rhode Island grade 11 students participated in the SAT School Day. Of the $79 \%$ of students who participated, $32 \%$ met the SAT College and Career Ready benchmark in both EBRW and Mathematics, 56\% met the college and career readiness benchmark for EBRW and 34\% met the college and career readiness benchmark for Mathematics.

## STUDENT GROUP RESULTS

Statewide, $39 \%$ of the total students testing population met or exceeded expectations in ELA/Literacy. Females outperformed males by 14 percentage points. The gap between students with and without disabilities was 38 percentage points. $5.2 \%$ of English learners met or exceeded
expectations while $29.2 \%$ of monitored English Language Learners met or exceeded expectations. $41.5 \%$ of non-ELL students met or exceeded expectations. The achievement gap for low income versus non-low income students was 32 percentage points.

In Mathematics, $31.6 \%$ of students met or exceeded expectations statewide. $32.3 \%$ of females met or exceeded expectations, while $30.9 \%$ of males met or exceeded expectations. $35.5 \%$ of students without disabilities met or exceeded expectations, compared with $5.3 \%$ of students with disabilities who met or exceeded expectations. $16.8 \%$ of low income students met or exceeded expectations, compared with the $45.7 \%$ proficiency rate of non-low income students.

## District Results ${ }^{1}$

Fifty-seven Rhode Island districts participated in PARCC English Language Arts/Literacy testing. 34 districts exceeded the state average of $39 \%$ of students meeting or exceeding expectations in English Language Arts/Literacy. Fifty of the 57 districts met or exceeded the participation rate target of 95\% for ELA/Literacy.

Of the 57 districts that participated in PARCC Mathematics testing, 28 districts met or exceeded expectations, achieving greater than the state average of $31.6 \%$ proficiency, and 53 districts met or exceeded the $95 \%$ participation target.

## School Results ${ }^{2}$

Of Rhode Island's 235 elementary and middle schools that participated in PARCC English Language Arts/Literacy testing, 14 had statistically significant increases in the percent of students who met or exceeded expectations while 15 had statistically significant decreases. Seventeen schools had $70 \%$ or more students who met or exceeded expectations (of those, 3 schools had $80 \%$ or more); 87 schools had $50 \%$ or more students who met or exceeded expectations; and 137 met or exceeded the state average of $39 \%$ on the PARCC English Language Arts/Literacy assessment.

Of Rhode Island's 235 elementary and middle schools that participated in PARCC Mathematics testing, 8 had statistically significant increases in the percent of students who met or exceeded expectations while only 7 had a statistically significant decrease. Seven schools had $70 \%$ or more students who met or exceeded (of those, 4 schools had $75 \%$ or more); 61 schools had $50 \%$ or more students who met or exceeded expectations; and 139 schools met or exceeded the state average of $32 \%$ in Mathematics.

[^0]
## Introduction

State assessments in English Language Arts/Literacy and Mathematics provide information that helps us understand how Rhode Island students are progressing on agreed-upon learning standards as expressed by the Common Core State Standards (CCSS). The results are one indicator among many that give us information about the health and vibrancy of our schools and their progress toward ensuring that all students are learning important skills and knowledge that will prepare them to be productive citizens, successful post-secondary learners, and employees in fulfilling personal careers.

This year's administration of the PARCC assessments sheds light on our progress toward our state's learning standards. The information does not define a district, school, or, most importantly, a student. Rather, the information offers an objective check on student learning and should be considered within a set of information that is known about his or her academic progress. PARCC assessments provide important information to families and to educators about student achievement and student progress in relation to their peers. Teachers and family members ${ }^{3}$ will use these results to identify student strengths and needs and to improve instruction. Schools and districts will review this year's data against the work that has been done to align curriculum and instructional practices to the CCSS.

The 2016-2017 school year was the first statewide administration of PSAT/NMSQT and SAT School Day. Governor Gina M. Raimondo included funds in the state budget to make the PSAT and SAT free for every public high school sophomore and junior. This ensures that all students can use the SAT to consider higher education opportunities. The PSAT/NMSQT and SAT are highly relevant to student future success because they focus on the skills and knowledge at the heart of education. The SAT sets an appropriately high standard for Rhode Island students and should be a good tool to help the state close the gap between expected future job requirements for post-secondary education and current college enrollment and completion.

## Connections to Teaching and Learning

Assessments are part of a larger system of teaching and learning. In isolation, assessment results cannot improve student achievement. Their power is realized when the results are reviewed against a school's curriculum, instructional practices, student work, grading practices, along with other local data and then action on this analysis is taken. We are able to see where we are in relation to last year and whether we are heading in
the right direction or need to make further adjustments. The work ahead of us is to use this information as one tool for the state, districts, schools, as well as parents and other stakeholders to work together to advocate for and support improved student learning.
$>$ Families can use the results to engage their child in conversations about school and his or her progress. ${ }^{3}$ Families can work with their child's teacher(s) to understand the report within the context of many other indicators of student learning. Finally, collectively, families can work within their school community to help shape the school's goals and planning.
$>$ Teachers can use this year's results to reflect on the instructional shifts they have made in comparison to their students' performance on the assessment. Student performance overall, on subclaims and on specific assessment questions may help them evaluate materials, supports, and curriculum they have used. The process of reviewing is best done in partnership with teachers working at the same grade level or instructing the same course. The collective analysis along with feedback through the evaluation process should shape ongoing professional learning.
$>$ Schools can use this information to look at patterns across grade levels and between student groups to make informed curriculum decisions, ensure that all students have the opportunity to learn, engage parents, and to make decisions that guarantee that all students are placed with teachers who can meet their needs.
$>$ Districts can use the results to review each school's performance to identify which supports and resources best meet the needs of their students. Districts can review patterns of performance between schools to identify those that need additional support. The results of these analyses can be used to engage the community on plans to move the district and its schools forward.
${ }^{3}$ More information on PARCC score reports for students is available online at www.UnderstandTheScore.org

## PARCC Statewide Results

The PARCC assessments summarize student performance through one of five performance levels including Exceeded Expectations, Met Expectations, Approached Expectations, Partially Met Expectations, or Did Not Yet Meet Expectations. In the 2016-17 school year, 73,685 students in English Language Arts/Literacy and 74,762 students in Mathematics participated in the PARCC assessments. Statewide, approximately $40 \%$ of students in grades 3 through 8 met or exceeded expectations in English Language Arts/Literacy, representing no change in ELA compared to last year. In Mathematics, statewide achievement also remained unchanged from last year, with $33 \%$ of students across grades 3 through 8 who met or exceeded the learning expectations for their grade level. As a result of changing test requirements, statewide results from previous administrations of the Geometry test are not comparable and therefore not reported here.

As a result of tremendous efforts by schools, approximately $97.4 \%$ of students took the assessment on computer platforms. The integration of technology and assessment is a reflection of our schools' use of technology to enhance instructional practices for students in classrooms. Further, the use of technology responds to the demands of post-secondary institutions and businesses that students be confident users of technology.
As a result of statewide conversations in all communities and increasing engagement with families, the statewide PARCC participation rates in both English Language Arts/Literacy and Mathematics reached 98\%. This marks an increase in PARCC English Language Arts/literacy and Mathematics participation rates compared to last year, which were $96 \%$ in both content areas. At the state level, both tests' participation rates are above the federal requirements to have at least $95 \%$ of students engaged in state testing.

Figure 1. PARCC Statewide Mathematics Results

Figure 2. PARCC Statewide ELA/Literacy Results

## PARCC State-Level English Language Arts/Literacy Results

PARCC results are reported in a number of ways so that districts, schools, teachers, and parents can see how students performed on each assessment. The results of the 2017 PARCC ELA/Literacy assessment by grade level, along with the 2015 and 2016 results, are presented in the tables and figures below. In English Language Arts/Literacy, Rhode Island demonstrated significant improvement from the 2015 to the 2017 administration in the percentage of students meeting or exceeding expectations in grades 3-6 and 8 . No significant changes were demonstrated in grades 7 or 9 . Only grade 8 ELA/Literacy demonstrated significant change from the 2016 to 2017 administration.

Table 1. PARCC Statewide ELA/Literacy (ELA/L) Results by Grade: 2015 to 2017

| ELA/L <br> Grade | $\begin{gathered} 2015 \\ \# \\ \text { Enrolled } \end{gathered}$ | $\begin{gathered} 2015 \\ \% \\ \text { Tested } \end{gathered}$ | $\begin{array}{\|c\|} 2015 \\ \% \\ \text { Meeting or } \\ \text { Exceeding } \\ \text { Expectations } \end{array}$ | $\begin{gathered} 2015 \\ S E \end{gathered}$ | $\begin{gathered} 2016 \\ \# \\ \text { Enrolled } \end{gathered}$ | $\begin{gathered} 2016 \\ \% \\ \text { Tested } \end{gathered}$ | $\begin{array}{\|c\|} \hline 2016 \\ \% \\ \text { Meeting or } \\ \text { Exceeding } \\ \text { Expectations } \\ \hline \end{array}$ | $\begin{gathered} 2016 \\ S E \end{gathered}$ | $\begin{gathered} 2017 \\ \# \\ \text { Enrolled } \end{gathered}$ | $\begin{gathered} 2017 \\ \% \\ \text { Tested } \end{gathered}$ | 2017 <br> \% <br> Meeting or Exceeding Expectations | 2017 $S E$ | Difference: <br> 2016 to 2017 <br> \% Meeting or Exceeding Expectations | Difference: <br> 2015 to 2017 <br> \% Meeting or <br> Exceeding <br> Expectations |

Figure 4. PARCC Statewide ELA/Literacy Results: Percent of Students in Each Performance-Level by Grades 6-9: 2015 to 2017

${ }^{4}$ Due to rounding, the five performance levels for each grade may not add up to $100 \%$.

Figure 5. PARCC Statewide ELA/Literacy Results: Percent of Students who Met or Exceeded Expectations: 2015 to 2017

In addition to capturing the percentage of students at each performance level, performance can be described as a scale score. The PARCC assessments have scale scores that range from 650 to 850 for overall performance in Mathematics and English Language Arts (ELA)/Literacy. Scale scores are useful to capture changes in performance over time. The table below represents the average scale scores in ELA/Literacy for students in our state. A score of 750 or higher indicates that students met or exceeded expectations of what students are expected to learn at each grade and in both content areas. While most students at all grade levels still "Approached Expectations" in English Language Arts/Literacy, it is worth noting that we are seeing growth within this performance level as students progress toward the 750 cut score for meeting grade-level expectations

Table 2. PARCC Statewide ELA/Literacy Scale Scores.

| Grade | 2015: <br> ELA/Literacy Average Scale Score (Range: 650-850) | $2015$ <br> State Perf. Level | 2016: <br> ELA/Literacy Average Scale Score (Range: 650-850)) | $2016$ <br> State Perf. [^4]
## PARCC State-Level Mathematics Results

The results of the 2017 PARCC Mathematics assessment by grade level, along with the 2015 and 2016 results, are presented in the tables and figures below. In Mathematics, Rhode Island demonstrated significant improvement from the 2015 to the 2017 administrations in the percentage of students meeting or exceeding expectations in grades 3-6, 8, and Algebra I. No significant changes were demonstrated in grades 7. No grades or courses demonstrated significant change from the 2016 to 2017 administration.

Table 3. PARCC Statewide Mathematics Results by Grade/Course: 2015 to 2017

| Math <br> Grade/Course | $\begin{gathered} 2015 \\ \# \\ \text { Enrolled } \end{gathered}$ | $\begin{gathered} 2015 \\ \% \\ \text { Tested } \end{gathered}$ | 2015 <br> \% <br> Meeting or Exceeding Expectations | $\begin{gathered} 2015 \\ S E \end{gathered}$ | $\begin{gathered} 2016 \\ \# \\ \text { Enrolled } \end{gathered}$ | $\begin{gathered} 2016 \\ \% \\ \text { Tested } \end{gathered}$ | 2016 <br> \% <br> Meeting or Exceeding Expectations | $\begin{gathered} 2016 \\ S E \end{gathered}$ | $\begin{gathered} 2017 \\ \# \\ \text { Enrolled } \end{gathered}$ | $\begin{gathered} 2017 \\ \% \\ \text { Tested } \end{gathered}$ | 2017 <br> \% <br> Meeting or Exceeding Expectations | 2017 $S E$ | Difference: <br> 2016 to 2017 <br> \% Meeting or Exceeding Expectations | Difference: <br> 2015 to 2017 <br> \% Meeting or Exceeding Expectations |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 3 | 10,839 | 96 | 36.3 | 0.5 | 10,952 | 98 | 43.7 | 0.5 | 10,829 | 99 | 44.2 | 0.5 | 0 | 8 |

Figure 7. PARCC Statewide Mathematics Results: Percent of Students in Each Performance-Level by Middle School Grades 6-8: 2015 to 2017

NOTE: Due to rounding, the five performance levels for each grade may not add up to $100 \%$.

Figure 8. PARCC Mathematics Results: Percent of Grade 3-8 \& Algebra I Students who Met or Exceeded Expectations: 2015 to 2017

## 2015 to 2017 PARCC Percent Met/Exceeded Expectations by Test: Mathematics

NOTE 1: Grade 8 percentages only include students who took the Grade 8 Math Assessment and State Average percentages only include Level 4 and Level 5.
NOTE 2: This graph includes all students (irrespective of grade) who were enrolled in Algebra I.
Table 4 below represents the overall scale scores in Mathematics for students in our state. A score of 750 or higher indicates that students met or exceeded expectations of what students are expected to learn at each grade or content area. As indicated in the table, most students Approached Expectations in Mathematics, with the exception of Grade 8, where students Partially Met Expectations. It bears noting that most Grade 3 students in Rhode Island are now only eight scale score points away from Met Expectations in Mathematics. Lastly, it also bears noting that the Grade 8 Mathematics data this year once again underestimates the overall Mathematics performance of our eighth-graders since $25 \%$ of them took the Algebra I test instead.

Table 4. PARCC Statewide Mathematics Scale Scores: 2015 to 2017

## Key

= Statistically significant decrease in average scale scores.
$=$ Statistically significant increase in average scale scores.
$\square=$ No statistically significant difference in average scale scores.

Course sequencing is especially important in Mathematics. Mathematical understanding develops cumulatively, requiring that students master certain concepts and skills in order to successfully engage in learning the next level of concepts and skills. Beginning in middle school some students begin to enroll in accelerated Mathematics courses. During the 2016-2017 school year, roughly $25 \%$ of students in $8^{\text {th }}$ grade took Algebra I instead of the PARCC Grade 8 Mathematics tests. As indicated in Tables 5 and Figure 9 below, these students met or exceeded expectations on the PARCC Algebra I assessment at significantly higher rates than those students who took these assessments in higher grades. Students in lower grades also generally demonstrated larger increases in the percent of students who met or exceeded expectations than the higher grades.
Table 5. PARCC Statewide Algebra I Results by Grade: 2015 to 2017

Figure 9. PARCC Statewide Algebra I Results: Percent of Students in Each Performance Level by Grade: $\mathbf{2 0 1 5}$ to 2017

As part of the changes in the Rhode Island required state assessment program for 2017, all students were no longer required to take the Geometry assessment before they exited high school. Instead, high school students needed to test once in high school. For the majority of students the test they took was Algebra I, but some students because of his or her course sequence took Geometry or Algebra II. Comparisons to previous years' performance on Geometry cannot be made due to the change in the population of students who took the test, therefore only 2017 results are provided.

## PARCC Student Group Results

The table below presents the overall performance among various groups of Rhode Island students. The profile by student groups is important because we are as concerned about the differences in achievement based on gender, ethnicity, student support services, or income levels as we are about the state as a whole. These differences in performance among groups are often referred to as opportunity gaps. In Rhode Island, as is the case nationwide, the differences are still too large. The challenge ahead of us is to ensure that all students have the opportunity to Our intense focus on achievement gaps needs to be combined with an equally intense focus on opportunity gaps. learn challenging content in safe and supportive schools led by great teachers and administrators.

## PARCC School Results

## Elementary and Middle School ELA/Literacy 2015-2017

The percent of students in each elementary and middle school who met or exceeded expectations from the 2015-2017 PARCC ELA/Literacy assessment administrations is provided in the table below. Of Rhode Island's 235 elementary and middle schools that participated in PARCC English Language Arts/Literacy testing, 14 had statistically significant increases in the percent of students who met or exceeded expectations while 15 had statistically significant decreases. Seventeen schools had $70 \%$ or more students who met or exceeded expectations (of those, 3 schools had $80 \%$ or more); 87 schools had $50 \%$ or more students who met or exceeded expectations; and 137 met or exceeded the state average of $39 \%$ on the PARCC English Language Arts/Literacy assessment.

## Elementary and Middle School Mathematics 2015-2017

The percent of students in each elementary and middle school who met or exceeded expectations from the 2015-2017 PARCC Mathematics assessment administrations is provided in the table below. Of Rhode Island's 235 elementary and middle schools that participated in PARCC Mathematics testing, 8 had statistically significant increases in the percent of students who met or exceeded expectations while only 7 had a statistically significant decrease. Seven schools had $70 \%$ or more students who met or exceeded expectations (of those, 4 schools had $75 \%$ or more); 61 schools had $50 \%$ or more students who met or exceeded expectations; and 139 schools met or exceeded the state average of $32 \%$ in Mathematics.

## Key

= Standard error (see Appendix D)

## High School ELA/Literacy and Mathematics 2017

The percent of students in each high school meeting or exceeding expectations from the 2017 PARCC ELA/Literacy and Mathematics assessment administration is shared in the table below. Because of the change in required high school tests administered during the 2017 administration, multiple years of school level data are not provided for comparison.

Table 13. PARCC ELA/Literacy and Mathematics: School Percent of Students Meeting or Exceeding Expectations: 2017

## PSAT/NMSQT and SAT School Day Results

## PSAT-NMSQT and SAT Statewide Results

The 2016-2017 school year was the first statewide administration of PSAT/NMSQT and SAT School Day. The PSAT/NMSQT and SAT provide section scores in Evidence-Based Reading and Writing (EBRW) and Mathematics as well as a total score. Section scores on the PSAT/NMSQT for EBRW and Mathematics range from 160-760 and the total score ranges from $320-1520$. Benchmarks are the scores that represent college readiness. The PSAT/NMSQT college readiness benchmark is 430 for EBRW and 480 for Mathematics. Section scores on the SAT School Day for EBRW and Mathematics range from 200-800 and the total score ranges from 400-1600. The SAT School Day college readiness benchmark is 480 for EBRW and 530 for Mathematics.

The PSAT/NMSQT was administered October 2016 in 63 Rhode Island schools. This represented $75 \%$ of all 10th grade students eligible to take the assessment in Rhode Island schools. Of the $75 \%$ of students who participated, $31 \%$ are on track to meet the "College and Career Ready" benchmark in both EBRW and Mathematics. As a state, $56 \%$ of participating students are considered on track to meet the college and career readiness benchmark for EBRW and 34\% for Mathematics.

In April 2017, 79\% of Rhode Island grade 11 students participated in the SAT School Day. Of the 79\% of students who participated, 32\% met the SAT College and Career Ready benchmark in both EBRW and Mathematics. 56\% of participating students met the college and career readiness benchmark for EBRW and 34\% for Mathematics.

## SAT School Day Statewide Student Group Results

The table below presents the overall performance among various groups of Rhode Island students on the 2017 SAT School Day. The profile by student groups is important because we are as concerned about the differences in achievement based on gender, ethnicity, student support services, or income levels as we are about the state as a whole. These differences in performance among groups are often referred to as opportunity gaps. In Rhode Island, as is the case nationwide, the differences are still too large. The challenge ahead of us is to ensure that all students have the opportunity to learn challenging content in safe and supportive schools led by great teachers and administrators.

Our intense focus on achievement gaps needs to be combined with an equally intense focus on opportunity gaps.

## PSAT/NMSQT School Results

The PSAT/NMSQT provides section scores in Evidence-Based Reading and Writing (EBRW) and Mathematics as well as a total score. Section scores on the PSAT/NMSQT for EBRW and Mathematics range from 160-760 and the total score ranges from $320-1520$. Benchmarks are the scores that represent college readiness. The PSAT/NMSQT college readiness benchmark is 430 for EBRW and 480 for Mathematics.

Sixty-three Rhode Island schools participated in the 2017 administration of PSAT/NMSQT. 8,679 students taking the PSAT/NMSQT represented 75\% of all $10^{\text {th }}$ grade students eligible to take the assessment in Rhode Island schools. Thirty-eight schools were at or above the state average of $75 \%$ participation. Thirty-seven schools had 76\% or greater participation rates and 3 schools had $95 \%$ participation or greater.

For Rhode Island students taking the PSAT, the average scale score for EBRW was 450. The state average percent of students who are on track to meet the "College and Career Ready" benchmark was $56 \%$. Twenty-eight out of 63 schools in Rhode Island were at or above the state average for college and career readiness for EBRW. The average scale score for these schools meeting or exceeding the benchmark was 483 . This is 33 scale score points above the state average.

In Mathematics, the Rhode Island scale score averaged 444. As a state, $34 \%$ of students are considered on track to meet the college and career readiness benchmark for Mathematics. Twenty-five of the 63 schools met or exceeded this benchmark. The average scale score for those schools meeting or exceeding benchmark was 475 .

Overall, the Rhode Island scale score is 895 for both EBRW and Mathematics. 31\% of Rhode Island students in 25 schools taking the 2017 PSAT/NMSQT have met or exceeded the college and career readiness benchmark.

## SAT School Day School Results

The SAT provides section scores in Evidence-Based Reading and Writing (EBRW) and Mathematics as well as a total score. Section scores on the SAT School Day for EBRW and Mathematics range from 200-800 and the total score ranges from $400-1600$. Benchmarks are the scores that represent college readiness. The SAT College and Career Readiness benchmark is 480 for EBRW and 530 for Mathematics.

Last April, 8,281 public school students participated in SAT School Day in Rhode Island. This represents $79 \%$ of grade 11 students. A review of school data shows that 41 schools had greater than $79 \%$ participation rate. Ten schools had $95 \%$ or greater participation.

The average scale score for SAT EBRW in Rhode Island was $498.56 \%$ ( 4,637 students) met the benchmark for college and career readiness. Thirty schools exceeded the Rhode Island average of $56 \%$ meeting the college and career readiness benchmark.

The average scale score for SAT Mathematics in Rhode Island was 490 with $34 \%$ of students meeting the benchmark for college and career readiness. Twenty-two schools exceeded the state average of $34 \%$ meeting benchmark.

## APPENDIX A

## Clarifying Information

## "Minimum Cell Size" Reporting Policy

RIDE Policy on minimum cell size for reporting data stipulates that if the number of students is less than 10 or if $100 \%$ of students performed at the same level (e.g. all students were at Level 2), then data must be suppressed to ensure confidentiality of individual student results. Throughout this report, cells with a dash (-) indicate that the number of students included in calculations was less than 10 or all students performed the same.

## PARCC Performance Levels

Based on the spring 2015 assessments, educators and experts were convened to determine what score each student must earn on the assessment in order to achieve a particular performance level. Performance levels help determine whether a student is on-track with grade-level expectations.

To review the specific ELA/Literacy descriptors, go to:
http://parcconline.org/assessments/test-design/ela-literacy/ela-performance-level-descriptors
To review the specific Mathematics descriptors, go to:
http://parcconline.org/assessments/test-design/mathematics/math-performance-level-descriptors
PARCC uses five performance levels that delineate the knowledge, skills, and practices students are able to demonstrate:

- Level 1: Did not yet meet expectations
- Level 2: Partially met expectations
- Level 3: Approached expectations
- Level 4: Met expectations.
- Level 5: Exceeded expectations

A student performing at Level 4 or Level 5 met or exceeded grade-level expectations and demonstrated a strong grasp of grade-level standards and readiness for the next step in a his/her educational development. Scores on the PARCC assessments will range from 650 to 850 , with a 700 representing the threshold of Level 2,725 representing the threshold of Level 3 , and 750 representing the threshold of Level 4 . The threshold score for Level 5 will vary slightly by assessment and will be approximately 800 .

A variety of stakeholders, nominated by the states, participated in panels to review the assessments. To determine what range of scores best matches each performance level, panelists used performance level descriptors for English language arts/literacy and Mathematics that indicate what a typical student at each level should know based on his/her command of grade-level standards. They used the performance level descriptors and actual assessment results and compared them to empirical studies to make their judgments. Each group went through at least three rounds of review per assessment to develop the "threshold scores," also known as "cut scores," for each performance level.

Two research studies helped determine the percentage of students likely to be college-and career-ready and the percentage of students likely to be on track for the next academic level at earlier grades: a postsecondary faculty judgment study; and a benchmark study of the SAT, ACT, NAEP, TIMSS, and PISA assessments.

Download additional information about the PARCC Performance Levels: Setting Performance Levels for the PARCC Assessment

## College and Career Readiness Benchmarks on SAT Suite of Assessments

Students are considered college- and career-ready when their SAT section scores meet both the Mathematics and the Evidence-Based Reading and Writing benchmarks. It is important to note that college readiness is a continuum - students scoring below the SAT benchmarks can still be successful in college, especially with additional preparation and perseverance. Students with an SAT Mathematics section score that meets or exceeds the benchmark have a $75 \%$ chance of earning at least a C in first-semester, credit-bearing college courses in algebra, statistics, precalculus, or calculus. Students with an SAT Evidence-Based Reading and Writing (ERW) section score that meets or exceeds the benchmark have a $75 \%$ chance of earning at least a C in first-semester, credit-bearing college courses in history, literature, social sciences, or writing classes.

Students who took the PSAT/NMSQT saw grade-level benchmarks on their score reports. Grade-level benchmarks indicate whether students are on track for college and career readiness. They are based on expected student growth toward SAT benchmarks at each grade.

The benchmarks used in this report were:

- SAT College and Career Ready Benchmarks
- Evidence-Based Reading and Writing: 480
- Mathematics: 530
- PSAT/NMSQT Benchmarks
- Evidence-Based Reading and Writing: 430
- Mathematics: 480

## APPENDIX B

## PARCC Performance Level Descriptors (PLDs)

## PARCC Performance Level Descriptors

Performance level descriptors (PLDs) outline the knowledge, skills, and practices that students performing at any given level should be able to demonstrate in each content area at each grade level to signal that they are academically prepared to engage successfully in further studies in each content area, the next grade's material and, later, at the high school-level for students to demonstrate that they are college and career ready.

## English Language Arts/Literacy (ELA/Literacy) PLDs: Grades 3-9

Performance level descriptors (PLDs) describe what student performance looks like at four levels: partial command of the content; moderate command; strong command; and distinguished command. In English Language Arts/Literacy, the performance levels at each grade level are written for the two assessment claims of reading and writing.

## Reading Claim

For the reading claim, the performance levels at each grade level are differentiated by three factors:

1. Text complexity
2. The range of accuracy in expressing reading comprehension demonstrated in student responses; and
3. The quality of evidence cited from sources read

This is an innovative departure from how ELA/Literacy performance level descriptors have been written in the past, but reflective of the Common Core's emphasis on a student's ability to find text-based evidence for generalizations, conclusions, or inferences drawn.

## Writing Claim

For the writing claim, PLDs are written for the two sub-claims:

1. Written expression
2. Knowledge of language and conventions.

Factors differentiating the performance levels for writing include how consistently and fully students develop ideas, including when drawing evidence from one or more sources, how well they organize their writing, and their command of grammar and language usage. Below are links to each grade level descriptor:

- PARCC Grade 3 Performance Level Descriptors
- PARCC Grade 4 Performance Level Descriptors
- PARCC Grade 5 Performance Level Descriptors
- PARCC Grade 6 Performance Level Descriptors
- PARCC Grade 7 Performance Level Descriptors
- PARCC Grade 8 Performance Level Descriptors
- PARCC Grade 9 Performance Level Descriptors
- PARCC Grade 10 Performance Level Descriptors

Mathematics PLDs: Grades 3-8, Algebra I, Geometry, and Algebra II
Performance level descriptors (PLDs) describe what student performance looks like at four levels: partial command of the content; adequate command; strong command; and distinguished command.

In Mathematics, the performance levels at each grade level are written for each of four assessment sub-claims:

1. Major content
2. Additional and supporting content
3. Reasoning
4. Modeling

The performance levels within each claim area are differentiated by a number of factors consistent with the Common Core's inclusion of standards for both mathematical content and mathematical practices.

Performance-Level Descriptors by Grade Band:

- PARCC Mathematics Performance Level Descriptors: Grades 3-5
- PARCC Mathematics Performance Level Descriptors: Grades 6-8
- PARCC Mathematics Performance Level Descriptors: High School

## Appendix C

## Split-Level Schools for PARCC Reporting

Throughout this report, grades 3,4 , and 5 are generally classified as "elementary school" grades whereas grades 6, 7, and 8 are classified as "middle school" and grades 9,10 , and 11 as "high school." In cases where a school spans more than one level of schooling (e.g. elementary and middle)-such as with schools that are K-12-RIDE divided the grades within the school using the above classification rules or by using classifications set by the local education agency (LEA) for accountability purposes. Below is a list of the schools with grades that span more than one school level and how each was designated for the purposes of this report.

Block Island School, New Shoreham

| Middle | Grades $6,7,8$ |

## Appendix D

## Calculating Standard Error (SE) to Determine Statistical Significance of Differences

For the purposes of this report, Standard Error (SE) is defined as a measurement of either the standard error of a percentage (e.g., \% Level $4+$ Level 5) or the standard error of a mean (e.g., average scale scores). Mathematically, SE's were calculated as follows:
$(S E)_{\text {percentage }}=\sqrt{\left(\frac{p q}{N}\right)}$, where $p$ is the percent of students who are Level 4 or above, $q=(100-p)$ and $N$ is the population or group size. $(S E)_{\text {mean }}=\left(\sqrt{\frac{2 \sigma^{2}}{N}}\right)$, where $\sigma$ is the standard deviation of the scale score distribution, and $N$ is the population or group size.
It is important to note that the derived SE is based on the size of the group being examined and its respective performance (read: \% Level 4 or above) on the PARCC assessments. Standard errors can be used to create a confidence interval around the derived percentage or average scale score so that you can see the range in which the "true" (e.g., measured without error) value is located. To do so, you can take the SE and multiply it by 1.96 (for a $95 \%$ confidence interval). The resultant product is then added and subtracted from the percent Level 4 or above, $p$, for example, to create a range of values in which you can be $95 \%$ confident that the "true" value is located. For example, viewing the percent Level 4 or above ( $p$ ) as the center point, if one adds the value of $\operatorname{SE}(1.96)$ to $p$ and also subtracts this value from $p$, then the full confidence interval is created with both an upper and lower boundary. So, if $p$ equals $70 \%$ and the SE equals .5 , then the product of SE and 1.96 equals $.5(1.96)$ or .965 Adding and subtracting this number from $70 \%$ creates the confidence interval, which ranges from $69.04 \%$ to $70.97 \%$. This is the range in which one can be $95 \%$ confident that the "true" value exists.

When comparing the performance of any two years or groups, we say that the difference in performance between the groups is statistically significant if the difference in performance between the two groups is larger than the sum of the SE's of the two groups. In other words, if the sum of the two SE's-each multiplied by 1.96 to get the $95 \%$ confidence interval-is larger than the value of the difference in performance between the two groups, then we say the difference is too small to be significant or meaningful because the difference doesn't fall outside of the range of plausible "true" values.

To illustrate this point, let's say that $60 \%$ of $4^{\text {th }}$ grade students at School $X$ were Level 4 or above in math in 2016 and the following year in 2017, $66 \%$ of $4^{\text {th }}$ grade students were Level 4 or above, thus resulting in an increase of +6 percentage points. If the sum of the 2016 SE(1.96) and the 2017 SE(1.96) is 6.5 , then the change from 2016 to 2017 of +6 percentage points at School $X$ is not large enough to be considered statistically significant. On the other hand, if $67 \%$ of $4^{\text {th }}$ graders in 2016 were Level 4 or above, then the +7 percentage point increase in performance would be larger than the standard error of 6.5 and this difference would be statistically significant.

## RIDE Department of Education

255 Westminster Street
Providence, RI 02903
(401) 222-4600

[^0]:    ${ }^{1}$ Throughout this report the term "district" is used as an inclusive identifier of traditional districts, charter schools, and state-operated schools, all of which are "Local Education Agencies" or LEAs.
    ${ }^{2}$ See Appendix C for information on how schools were counted.
