

ATTACHMENT C - VENDOR PRICING TEMPLATE - Program Year 2010/11

This is a **preliminary list** including current program participants.
 Vendors should note that the consortium 470 includes **ALL** schools and libraries. The list will be finalized over the next several months.
 It is helpful if the vendor indicates if the prices for any of these schools can be generalized for all locations. If there are exceptions, please note.
 Sites and services will be allocated based on final selected service offeres per vendor bids.
 NR = No Bid from specific vendor
 N/A= Vendor response is not applicable to this site for any of several reasons explained more completely in the narrative.
 Blanked schools / sites / prices represent site locations where services cannot/will not be provided in this current program year
 This list represents a specific demand for services to be finalized in a contract with each vendor.
 District lines or head ends (except CLAN) are to be connected to the RINET core.
 Unusual costs associated with district equipment changes or equipment needed at the host ISP should be included in the pricing.
 Vendors must quote and size their access to the cloud head end(s) and RINET/CLAN where applicable.
Vendors should complete BOTH the pricing table and the site specific portions of this attachment.
 Vendors may insert rows into the pricing table where appropriate.
