Kindergarten Science Scope and Sequence

Unit of Study 1: Weather (20 days)

Standards that appear this unit: K-ESS2-1, K-ESS3-2*, K-2-ETS1-1

K. Weath	her and Climate					
Students	who demonstrate understanding can:					
K-ESS2-1. Use and share observations of local weather conditions to describe patterns over time. [Clarification Statement: Examples of qualitative observations could include descriptions of the weather (such as sunny, cloudy, rainy, and warm); examples of quantitative observations could include numbers of sunny, windy, and rainy days in a month. Examples of patterns could include that it is usually cooler in the morning than in the afternoon and the number of sunny days versus cloudy days in different months.] [Assessment Boundary: Assessment of quantitative observations limited to whole numbers and relative measures such as warmer/cooler.]						
	rmance expectations above were developed using the follo Science Education:	owing elements from the NRC docu	ment A Framework			
Analyzing to collecti • Use ob patterr question Science I • Scienti	Science and Engineering PracticesDisciplinary Core IdeasAnalyzing and Interpreting DataESS2.D: Weather and ClimateCrosscutting ConceptsAnalyzing data in K-2 builds on prior experiences and progresses to collecting, recording, and sharing observations.• Weather is the combination of sunlight, wind, snow or rain, and temperature in a particular region at a particular time. People measure these conditions to describe and record the weather and to notice patterns over time. (K-ESS2-1)• Patterns					
	vations about the world. (K-ESS2-1)	1)

Unit of Study 5: Pushes and Pulls (20 days)

Standards that appear this unit: K-PS2-1, K-PS2-2*, K-2-ETS1-3

K. Forces and Interactions: Pushes and Pulls					
Students who demonstrate understanding can:					
 Students who demonstrate understanding can: K-PS2-1. Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object. [Clarification Statement: Examples of pushes or pulls could include a string attached to an object being pulled, a person pushing an object, a person stopping a rolling ball, and two objects colliding and pushing on each other.] [Assessment Boundary: Assessment is limited to different relative strengths or different directions, but not both at the same time. Assessment does not include non-contact pushes or pulls such as those produced by magnets.] 					
The performance expectations above were developed Framework for K-12 Science Education:	d using the following elements from the NRC o	document A
