Spring 2022 Rhode Island
Next Generation Science Assessment
Individual Student Report

Name: Doe, Jennifer A.
SASID: 9999991234
Date of Birth: 04/29/2011
District: Demo District (9999)
School: Demo Elementary School (99999999)
Grade: 5

What is the Next Generation Science Assessment? (NGSA)
This report provides your child’s results from the 2022 Next Generation Science Assessment (NGSA). The NGSA measures student knowledge and skills on the Next Generation Science Standards (NGSS) that Rhode Island adopted in 2013 (www.ride.ri.gov/NGSS). NGSA is administered to students in grades 5, 8, and 11 and provides information on student knowledge and skills in the areas of life sciences, physical sciences, and earth and space sciences.

State tests provide valuable information for you and your child’s teacher
The COVID-19 pandemic brought new challenges to our schools, and parents, teachers, and administrators worked together over the last two years to address and overcome these challenges. Last year’s assessment results revealed the cumulative impact of the COVID-19 pandemic on students’ academic achievement has been large. They placed a spotlight on a new baseline for schools across Rhode Island and the need to accelerate learning for all students. In alignment with the findings from the Learning, Equity & Accelerated Pathways (LEAP) Task Force (https://www.ride.ri.gov/InsideRIDE/AdditionalInformation/LEAPTaskForce.aspx), RIDE and local education agencies remain committed to rebuilding and reimagining Rhode Island’s educational system, offering greater access to enriching learning opportunities, and helping students leap ahead in academic achievement.

We thank you for your participation in these tests which helped guide this critical work to improve outcomes for students. While it is important to acknowledge the pandemic’s impact, we must now focus on understanding your child’s understanding of science knowledge and skills. We hope this report can help inform and empower you as you advocate for your child. You know your child best. For more information on how to understand the results, visit www.RIDE.ri.gov/Assessment-Results.

The report shows:
- Your child’s score between 37 and 59 and their achievement level
- Your child’s achievement compared to school, district, and state averages
- How your child performed in the different areas of science measured by this assessment

Your Child’s Overall Results in Grade 5

Approaching Expectations
Score
49
(Score range: 1-120)

What Do I Do Next?
After reviewing this report, it is critical that you connect with your child’s school by attending family-teacher conferences and discussing with your child’s teachers your questions and concerns. Don’t be afraid to speak up. Children whose families stress the value of education are more likely to find it important, as well.

- School attendance matters, every single day. Missing just two days of school a month is chronically absent, so make it a priority to get your child to school on time daily.
- Establish daily reading routines, let your child see you read, and encourage your child to read for fun all year long.
- Get involved and stay connected to your child’s school, however and whenever you can.
- Share your voice! Help improve your child’s school by participating in SurveyWorks every year.
- Start a conversation. Ask questions. Talk to your child about what they’re learning and show an interest in the subjects that excite them.

Remember, you are your child’s first teacher, and you play an important role in setting your child up for success.

Did you know that establishing family routines can help your child succeed?
Make a habit of setting up designated times for homework, reading, mealtimes, family conversations, bedtime, and leaving for school each day.

Jennifer’s Science Score

Approaching Expectations

Your Child’s Score: 49

Jennifer’s Science score is 49. This score is lower than the average score of fifth graders in the school, lower than that of fifth graders in the district, and similar to that of fifth graders statewide.

Achievement

How your child performed compared to students in their school, district, and state.

How Did Your Student Perform in the Different Areas of Science?

**Life Sciences**

Your student can consistently model life cycles and movement of matter in ecosystems; use evidence to explain that organisms need structures to live; and interpret data to show that individuals inherit traits, populations have different traits, and some organisms thrive in specific environments.

**Physical Sciences**

Your student can sometimes conduct experiments to explain the structure of matter, signs of chemical change, and how forces affect the motion of objects; use evidence to explain speed and energy transfer; and model particles of matter and light waves.

**Earth and Space Sciences**

Your student may have difficulty presenting data to show the results of Earth’s movements around the sun; graphing where fresh and salt water exist on Earth; modeling interactions of the geosphere, biosphere, hydrosphere, and atmosphere; and using evidence to analyze solutions to hazards caused by weather.
