

2021 RI State Assessment Program: Training for Test Coordinators

Each assessment in the RI State Assessment Program (RISAP) has a different set of requirements in order for test coordinators to prepare and coordinate that particular assessment.

All test coordinators must participate in RIDE-hosted trainings for RISAP general policies and all state assessments to be given in that district/school. Recordings and presentations of the webinars from February 2021 are posted at www.ride.ri.gov/assessment-training under each assessment's pane for viewing and reference. *Note:* the RISAP general policies webinar is repeated in each of the panes for convenience.

This document provides assessment-specific training requirements and supporting resources to help test coordinators in their preparation (see all available materials at www.ride.ri.gov/assessment-manuals).
