

The third unit within the Kindergarten Curriculum Pilot Project focuses on the theme of Construction. As the kindergarteners think, learn, and explore this theme, Governor Raimondo challenged our kindergarteners to create a model that answered this question:

What could we build in our state to make Rhode Island a better place for children?

Our kindergartners are excited to showcase the hard work and the amazing learning occurring within their Construction Unit across many of the classrooms involved in the Kindergarten Curriculum Pilot Project.

Please click on links below to see the ideas the kindergarten students created.

[Children's Park](#) - Maria Santonastaso's class at Glen Hills Elementary School, Cranston
