

Problem Solving Rubric

| How Well Did You Do This? | Understanding and representing the problem situation | Solving the problem in ways that make sense and are efficient | Computing and explaining with accuracy and precision |
|--|--|---|--|
| <u>No evidence</u> | No attempt | No attempt | No attempt |
| <u>Good start</u> (You did a piece of it) | Your representation shows that you understood some of the problem situation and the related math concept(s).  | You tried to solve the problem in a way that doesn't make sense for this situation.  | You attempted precision in your work, but still had several errors that impacted the solution.  |
| <u>Almost There</u> (You have almost all of the pieces) | Your representation shows that you understood most of the problem situation and the related math concept(s).  | You solved the problem in a way that makes sense for this situation but may not be efficient.  | Your work, explanation, and drawings were mostly precise, but you had a minor error OR an idea that was unclear.  |
| <u>Excellent</u> (You fit all of the pieces together in a great way) | Your representation shows that you completely understood the problem situation and the related math concept(s).  | You solved the problem in a way that makes sense for this situation AND is efficient.  | You were accurate in all of your computation and your choice of precise math language and drawings made your explanation clear.  |
